3.1	The Multiple Governance Framework	40
3.2	The <i>trinity of governing</i> . Factor clusters	41
6.1	Research perspectives on the intersection of policy implementation and social inequality	97
11.1	Loci of digitalization in the public domain	160
15.1	Comparing formal and informal perspectives on accountability	228
16.1	Profiles of administrative systems in Europe	244
17.1	Dimensions of the street level	267
17.2	Organizational dimensions	269
17.3	System dimensions	271
17.4	The <i>Work setting matters</i> hypothesis	274
17.5	The <i>Control matters</i> hypothesis	274
17.6	The <i>Motivation matters</i> hypothesis	275
17.7	Causal logics in explaining variation in policymaking results	275
17.8	The <i>trinity of governing</i> : Tentatively weighing factor clusters	277
20.1	Summary of main quantitative ‘techniques’	306
21.1	Main qualitative approaches	323
21.2	Initial coding scheme	329
21.3	Case-ordered descriptive meta-matrix: Describing the reform results	332
21.4	Conceptually clustered matrix: Merging findings on reform results (Y) and hypothesized factors affecting the reform (X)	333
24.1	Conditions for deficient performance (fictional truth table)	376
24.2	Different calibration techniques and verbal interpretation: Crisp and fuzzy sets	380
24.3	Intermediate solution for appropriate performance (Thomann 2015)	385
25.1	Examples of vignettes comparing Danish and American teachers	400
25.2	Example of qualitative vignette experiment on social class effects	405
27.1	Dimensions of a public ethics of care and a public ethics of justice. Factor analysis (varimax rotated)	440
27.2	A typology of street-level bureaucrats’ reasoning	442
27.3	Street-level bureaucrats’ reasoning in two dimensions	445
30.1	The <i>triple identity</i> of a street-level bureaucrat	490
