Woodrow Barfield served as Professor of Engineering at the University of Washington's Department of Industrial and Systems Engineering with a courtesy appointment in the Departments of Environmental Health and Civil Engineering. He holds a PhD, a JD, and an LLM; is currently Associate Editor for the *Virtual Reality Journal*, is a former senior editor of the MIT journal *Presence: Teleoperators and Virtual Environments*, and was on the editorial board of the *Washington Journal of Law Technology & Arts*. Further, he was Visiting Professor in computer science at University College, London, and was on the program committee which established the first conference on wearable computers and augmented reality. He also edited the first academic books on the same topics. He is a recipient of the National Science Foundation's Presidential Young Investigator Award and was an External Fellow for Stanford's Center for Internet and Society. His writings, which include more than 300 scholarly papers, discuss the law of virtual and augmented reality, and how the law applies to artificial intelligence and to humans enhanced with implanted technologies such as neuroprosthesis and brain-computer interfaces. His most recent books are *Cyber Humans: Our Future with Machines* and the edited collection *Fundamentals of Wearable Computers and Augmented Reality* (2nd edition), and he is coediting, with Professor Ugo Parallo, the forthcoming *Research Handbook on Law and Artificial Intelligence*. In addition, he frequently lectures on systems of the future at Duke University and publishes in engineering journals and law reviews, actively reviews for several journals, serves on various program committees, and gives invited keynote talks and lectures.

Paul Schiff Berman is Walter S. Cox Professor of Law, George Washington University. He is one of the world's foremost theorists on the effect of globalization on the interactions among legal systems and is the author of more than 60 scholarly works, including *Global Legal Pluralism: A Jurisprudence of Law beyond Borders*, published by Cambridge University Press in 2012. He was also among the first legal scholars to focus on legal issues regarding online activity, and he is coauthor of one of the leading casebooks in the field. In addition to his scholarly work, Professor Berman has extensive experience in university and law school administration, having served as Vice Provost for Online Education and Academic Innovation at The George Washington University, Dean of the George Washington University Law School, and Dean of the Sandra Day O'Connor College of Law at Arizona State University. Professor Berman has previously served as the Jesse Root Professor of Law at the University of Connecticut School of Law and was a Visiting Professor and Visiting Research Scholar at Princeton University in the Program in Law and Public Affairs. Since 2016 he has served as a Distinguished Visiting Professor at the Queen Mary University of London. He has served on the Organizing Committee of the Association for the Study of Law, Culture, and the Humanities and was cochair of the International Law and Technology Interest Group of the American Society of International Law from 2014 to 2016. Prior to academia, he clerked for Chief Judge Harry T. Edwards of the United States Court of Appeals for the District
Marc Jonathan Blitz is Alan Joseph Bennett Professor of Law at Oklahoma City University School of Law. He is a graduate of Harvard University and has a law degree and a PhD in Political Science from the University of Chicago. His scholarship focuses on constitutional protection for freedom of thought, freedom of expression, and privacy law—and especially on how each of these areas applies to emerging technologies. He has written articles on how First Amendment free speech doctrine and/or Fourth Amendment doctrine on search and seizure law should apply to government use, or regulation, of, public video surveillance (using fixed CCTV camera systems, or drone-mounted cameras, or policy body cameras), biometric identification methods, and electronic information systems. His articles also include analyses of the First Amendment status of video gameplay and other uses of virtual reality technology, and his recent work has focused on the intersection of constitutional law and neuroscience and psychology. Prior to entering academia, he worked as an attorney at Wilmer Cutler Pickering Hale and Dorr in Washington DC, where his work focused on telecommunications, privacy law, computer law, intellectual property, constitutional law, and antiterrorism security measures. While working in Washington, he was also one of the reporters for the Constitution Project’s Liberty and Security initiative and was one of the drafters of its Guidelines on Public Video Surveillance.

John Danaher is Lecturer at the National University of Ireland School of Law, Galway, Ireland. He holds a BCL from University College Cork (2006), an LLM from Trinity College Dublin (2007), and a PhD from University College Cork (2011). He was lecturer in law at Keele University in the UK from 2011 until 2014. He joined NUI Galway in July 2014. His research interests lie, broadly, in the areas of philosophy of law and emerging technologies and law. In the past, he has published articles on human enhancement, brain-based lie detection, the philosophy of punishment, and artificial intelligence. He maintains a blog called Philosophical Disquisitions, and he also writes for the Institute for Ethics and Emerging Technologies.

Wian Erlank is Associate Professor of Law, North-West University, Potchefstroom, South Africa. His current and previous lecturing experience takes in the areas of property law, land reform, research methodology, legal skills, and legal writing. He was involved with the creation of the first compulsory three-year language and communication course as part of a legal degree. He is a member of many committees, including Teaching, Re-Curriculation, Research, Ethics (as chairperson), the Student Disciplinary Committee, and the Work Group on Teaching and Learning Technology. He is a board member of the Association of Law Property and Society (ALPS) and an advisory board member of the Young Property Lawyers’ Forum (YPLF), and the South African Literary Awards board (SALA). Additionally, he is a founding member and treasurer of the South African Association of Intellectual Property Law and Information Technology Law Teachers and Researchers (AIPITL). Finally, he is a member of the Academy of Science for South Africa’s Committee on Scholarly Publishing in South Africa (CSPiSA), a member of the Scholarly Publisher Editors’ Forum, and a Fellow of the European Law Institute (ELI).
Josh A.T. Fairfield is Professor of Law at Washington and Lee University. He is an internationally recognized law and technology scholar of digital property, electronic contract, big data privacy, and virtual communities. He has published articles in top law journals, as well as the New York Times, Forbes, and the Financial Times. He is a Fulbright grant recipient and member of the American Law Institute.

S.J. Blodgett-Ford is Member and Chief Privacy Officer, GTC Law Group PC, and Adjunct Professor, Boston College Law School (Privacy Law and Mobile App Development), CIPP/US. Blodgett-Ford focuses on intellectual property strategy and transactions, mergers and acquisitions, and data privacy and security, and was previously General Counsel, Tetris Online, Inc. and Senior Manager, Intellectual Property, Nintendo of America Inc. Blodgett-Ford taught advertising law in the University of Washington IP LLM program.

Jon M. Garon is Dean of Nova Southeastern University Shepard Broad College of Law. He is a nationally recognized authority on technology law and intellectual property, particularly copyright law, entertainment, and information privacy. Prior to joining Nova Southeastern University in 2014, Garon was the inaugural director of the Northern Kentucky University Salmon P. Chase College of Law, Law + Informatics Institute from 2011 to 2014, and has been active in legal education since 1991. He is the author of four books and numerous book chapters and articles, including The Entrepreneur’s Intellectual Property & Business Handbook (Manegiare Publications 2018); Pop Culture Business Handbook for Cons and Festivals (Manegiare Publications 2017); The Independent Filmmaker’s Law & Business Guide to Financing, Shooting, and Distributing Independent and Digital Films (A Cappella Books, 2d Ed. 2009); Own It—The Law & Business Guide to Launching a New Business Through Innovation, Exclusivity and Relevance (Carolina Academic Press 2007); and Entertainment Law & Practice (2nd edition 2014 Carolina Academic Press).

Gabriel Hallevy is Full Professor at the Faculty of Law, Ono Academic College, Israel. He lectures in criminal law, criminal justice, evidence law, corporation law, conflict of laws, bankruptcy law, and game theory in law. He has published more than 30 books (as to 2018) in Israel, the US, and Europe, most of which are cited by the Israeli Supreme Court, and a few dozen articles in the US, Australia, Europe, India, and Israel. He earned his LLB and LLM magna cum laude from Tel-Aviv University, and his PhD summa cum laude from Haifa University. The Knesset, the Israeli Parliament, granted him a special honorary prize for research in criminal law. In 2013 he was chosen as one of the 40 most promising Israelis under the age of 40 (“Top 40 under 40”) by Globes magazine in Israel. He is a long-distance runner, holds a pilot’s license, and speaks Hebrew, English, French, and German.

Brooke Lewis holds a JD degree from Rutgers Law School, where she graduated with honors and a certificate in Criminal Law and Procedure. At graduation, she was awarded the Rutgers Blaine E. Capehart Award for Legal Writing Excellence. As a research assistant to Professor Ellen P. Goodman, she worked on issues related to “algorithmic transparency” and contributed to the Rutgers Institute for Information Policy and Law blog. She also served as a Senior Notes and Comments Editor for the Rutgers University Law Review.
Hannah YeeFen Lim is Associate Professor of Law, Nanyang Technological University, Singapore, where she is utilizing her dual expertise in computer science and law in research projects tackling the legal and ethical issues of artificial intelligence (AI) machines and autonomous systems including autonomous vehicles (AVs). Her book *Autonomous Vehicles and the Law: Technology, Algorithms and Ethics* will be published in 2018 by Edward Elgar Publishing. She graduated with double degrees in Computer Science and Law from the University of Sydney, where she went on to complete a Master of Laws by Research with Honors under a Telstra Scholarship. She was a full-time visiting professor at the Faculty of Law, National University of Singapore from 2007 to 2011. Prior to that, she taught at the University of Sydney and UNSW. In 2013, she was Visiting Scholar at the University of Cambridge; in 2010, she was Visiting Researcher at Berkman Center for Internet & Society, Harvard University. Hannah is an internationally recognized legal scholar in Technology & Internet Law, IP Law, Data Protection and Privacy Law, and Cybercrime Law. She wrote one of the pioneering and seminal books on Internet law, *Cyberspace Law* (Oxford University Press 2002), and her research has been cited with approval by senior judiciary, most notably by the High Court of Australia. Hannah is the author of six scholarly books published by internationally established publishers.

Crystal Nwaneri is a former fellow with the Berkman Klein Center for Internet and Society and is based in Silicon Valley. Her research covers a wide range of topics, including intellectual property law, virtual reality, innovation, and online media. She received her JD from Harvard Law School and her BA from Stanford University in Communication with a minor in Science, Technology and Society. At Stanford, she spent a year working as research assistant at the Virtual Human Interaction Lab, which studies the implications of human interactions in immersive virtual reality. She is the author of “Ready Lawyer One: Legal Issues in the Innovation of Virtual Reality,” published in the *Harvard Journal of Law and Technology*, and “Internet Retransmissions in the Real World: A Comparative Analysis of the Legal and Economic Effects of Over-the-Top Broadcast Services in Singapore, the United States, and Abroad,” published in the *Information & Communications Technology Law Journal*.

Scott R. Peppet is Professor of Law and Wolf Getches Fellow at the University of Colorado Law School in Boulder, Colorado, where he has taught since 2000. His scholarship is focused on two areas: the ethics of alternative dispute resolution; and privacy, technology, and contract. In the former area he has published both an award-winning book, *Beyond Winning* (Harvard University Press 2004), and various academic articles on the use of contingency fees by mediators, the use of mediation in transactions as opposed to disputes, and the ethics of collaborative law. His more recent scholarship on privacy, technology, and contract has focused on the privacy problems of self-disclosure, the privacy implications of the Internet of Things, the impact of new technologies on consumer contract law, and the ways in which technology is changing prostitution markets.

Michael Risch is Associate Dean of Faculty Research and Development and Professor of Law at Villanova University Charles Widger School of Law. Professor Risch's teaching and scholarship focus on intellectual property and internet law, with an emphasis on patents, trade secrets, and information access. His articles have appeared in the Stanford Law Review, among others, and his work has been cited by the U.S. Supreme Court.
Research handbook on the law of virtual and augmented reality

to joining the Villanova faculty in 2010, he was an Associate Professor at the West Virginia University College of Law, an Olin Fellow in Law at Stanford Law School, and a partner at boutique IP law firm Russo & Hale LLP. Professor Risch graduated from Stanford University with honors and distinction in public policy and distinction in quantitative economics. He earned his law degree at the University of Chicago, where he graduated with high honors and was an Olin Fellow in Law & Economics and a Bradley Fellow in Law & Economics.

Andrew L. Rossow is an internet attorney, adjunct Professor of Cyberspace Law at the University of Dayton School of Law, and contributor for many publications including Forbes Crypto, Blockchain Magazine, Thrive Global, and Cyber-Defense Magazine. Andrew concentrates his practice on cyberspace law and internet law, criminal defense, intellectual property law, contractual disputes, and most recently blockchain technology evaluations.

Jack Russo is Managing Attorney of ComputerLaw Group, LLP, in Palo Alto, California (www.computerlaw.com). He specializes in internet, computer law, and intellectual property litigation, in the federal and state trial and appellate courts. He is a member of the California, New York, DC, Oregon, Washington and Hawaii State Bars and Chairman of the Foundation for Creativity in Dispute Resolution (www.ffcdr.com). He has undergraduate and graduate degree from CUNY in administration and computer and information science and a JD from UCLA School of Law where he was both on the law review and the Moot Court. Jack also holds an MBA from Columbia University. He has written many articles on computer law, and he has spoken on IP, Internet, AI, and other computer industry issues to, among others, the American Bar Association, the Practicing Law Institute, the Computer Law Association, and the San Francisco Bay Area Intellectual Property Inn of Court. More about him and his firm can be found on www.computerlaw.com.

Mirjam Supponen is Associate at GTC Law Group PC and focuses on technology, internet and data privacy law. Supponen is a certified Information Privacy Professional in Europe (CIPP/E) and the United States (CIPP/US). Supponen holds a Master of Laws (LLM with a specialization in international data privacy law) from the University of Helsinki in Finland and a JD from the University of Hawaii.

Amber M. Underhill is Associate at Warner, Norcross & Judd LLP, Grand Rapids, Michigan. Amber is a member of the firm's Intellectual Property practice group, specializing in trademarks and copyrights. Before becoming an attorney, she worked for seven years as an IP paralegal. Amber is also a member of her firm's Emerging Media and Technologies Team, and has significant experience managing the portfolios of companies in the augmented and virtual reality industry, among many others. Amber’s true passion is client service and providing the most practical advice to protect and enhance each client’s valuable intangible assets.

Brian D. Wassom is Partner, Warner, Norcross & Judd LLP, Southfield, Michigan. Brian litigates disputes and provides counsel for clients in a wide range of commercial and intellectual property matters. He has developed a particular focus in matters of creative expression, commercial identity, and privacy, which spans the legal doctrines of
Contributors

Copyright, trademark, privacy, publicity rights, advertising, journalism, and related fields. A futurist at heart, Brian has become a globally recognized thought leader in the brand new legal issues raised by augmented reality and other cutting edge emerging media. He leads his firm’s groups focused on Emerging Media and Technologies, Media Litigation, and Privacy Litigation, and regularly writes and speaks on these topics. An accomplished litigator, Brian has achieved victories for his clients in federal and state trial and appeal courts across the country. He was the lead counsel for the plaintiff in *Candy Lab, Inc. v. Milwaukee County* (E.D. Wis. 2017), resulting in the first judicial decision applying First Amendment free speech rights to the medium of augmented reality.

**Alexander Williams** is Research Associate in Law and Technology, Chapel Hill, NC. Alex’s research focuses on the integration of technology into the body, and intellectual property law applied to virtual and augmented reality displays. He holds a degree in philosophy from the University of North Carolina and is trained in Six Sigma and principles of Experiment Design. He is the coauthor, with Dr Woodrow Barfield, of “Law, Cyborgs, and Technologically Enhanced Brains” and “Cyborgs and Enhancement Technologies,” both accessible online at *Philosophies*.

**Gilad Yadin** is a Senior Research Fellow at the University of Haifa Center for Cyber Law and Policy. He holds a PhD from the Haifa University Center for Law and Technology. Dr Yadin consults on technology law and ethics and teaches at several academic institutions. In the past he drafted cybercrime legislation for the Israel Ministry of Justice, clerked for a criminal court judge, and managed a research and development group at a top cybersecurity firm. His research has been published in leading law and technology journals such as *Cardozo AELJ* and *Vanderbilt JETLaw*.
