Maria Carmela Agodi is Professor of Sociology at the University of Naples Federico II (UNINA), Italy. She was Chair of the Research Network on Women's and Gender Studies (2011–2017) within the European Sociological Association (ESA) and a member of the ESA Executive Committee. Since 2012 she has been co-editor of the ESA book series (Routledge). In the ESA she is currently Chair of the Council of National Associations. Between 2015 and 2017 she worked on the EU FP7 GENOVATE Project (Transforming Organizational Culture for Gender Equality in Research and Innovation) at UNINA, where she is currently in charge of the Evaluation studies area of the Gender Observatory on University and Research.

Sharmistha Bagchi-Sen is Professor in the Department of Geography at the State University of New York at Buffalo (SUNY-Buffalo), USA. Her research career has focused on urban and economic geography topics. She served as the Editor-in-Chief of the *Professional Geographer* (2005–2010). She is an Associate Editor of the *Journal of Applied Geography*. Since 2001 her research has been supported by several grants from the National Science Foundation of the United States. She served as a Director of SUNY-Buffalo's Gender Institute and was a Fellow of the American Council on Education (2006–2007) at the University of California, Los Angeles (UCLA).

Ning Baines is a Lecturer in Marketing, De Montfort University, Leicester, UK. Her research interests lie in the field of new product and service development and innovation, specifically in university spin-off and start-up contexts. She has been involved in many research activities, such as projects funded by the European Commission, the British Academy, the Leverhulme Trust and the Oxfordshire Economic Observatory.

Rita Biancheri is Associate Professor in the Sociology of Cultural and Communicative Processes at the Department of Political Science of the University of Pisa, Italy. Her primary research interests lie in university education and family and occupational dynamics from a gender perspective. She has published a number of monographs and articles on these subjects. In recent years, her studies have focused on the health sector and

she has coordinated multidisciplinary research groups on safety in the workplace. She was the lead scientist at the University of Pisa, Italy, in the European TRIGGER Project.

Norbert Buzás is the Head of the Department of Health Economics at the Faculty of Medicine, University of Szeged, Hungary. He also serves as Head of the Knowledge Management Research Center of the university. He worked as the intellectual property director of a biotech company for six years and director of professional operations at the largest private Hungarian business acceleration company. He was the Funding Director of the Directorate of Innovation Management and Technology Transfer at the University of Szeged. His research interests lie in the field of technology innovation, with a focus on responsible innovation, science-to-business marketing, co-creation and behavioural economics in healthcare.

Silvia Cervia is Assistant Professor in the Sociology of Cultural and Communicative Processes at the Department of Political Science of the University of Pisa, Italy. She was a member of the Core Team of the European TRIGGER Project. Her research focuses on gender issues, female participation in science and governance and on the exclusion dynamics in education processes. The results of her research have been published in national and international journals and in a number of collaborative publications.

Gary Chapman is a Senior Lecturer at the Leicester Castle Business School, De Montfort University, Leicester, UK. His research focuses around the concept of behavioural additionality and innovation policy, and has appeared in journals such as *Research Policy* and *Technovation*.

Laurel D. Edmunds is Senior Research Fellow in the Radcliffe Department of Medicine, Medical Sciences Division at the University of Oxford, UK. She has spent more than 20 years working in a variety of research environments: medical, academia, consultancy and new product design. Much of her research has focused on obesity, particularly in children, including systematic reviews and qualitative research. More recently she has focused on gender equality, especially in academic medicine, and the expansion of biotechnology and translational medicine.

Henry Etzkowitz is President of the International Triple Helix Institute in Silicon Valley, USA; quondam Lecturer at Stanford University, USA; and Visiting Professor, Birkbeck, University of London, UK. He is a co-author of *Athena Unbound: The Advancement of Women in Science* (Cambridge University Press, 2000). A forthcoming book is *Gender Dynamics of Science and Technology* (also with Cambridge University Press).

Lene Foss is Professor of Entrepreneurship and Innovation and Programme Director of Master of Science in Business Creation and Entrepreneurship at UiT – The Arctic University of Norway. Her research concentrates on gender in entrepreneurship and innovation, academic entrepreneurship, and responsible research and innovation. Foss is Editorial Consultant for the *International Journal of Gender and Entrepreneurship*. She currently serves on the international research board of the journal *Small Business Management*. Foss holds board membership at the Institute for Small Business and Entrepreneurship (UK) and the University Industry Innovation Network (Netherlands).

Forough Ghahramani is a transformative leader in higher education, a technologist and an entrepreneur. She is Associate Director of Rutgers Discovery Informatics Institute (RDI²) at Rutgers, State University of New Jersey, USA.

Jennifer Gottwald is a Senior Licensing Manager at the Wisconsin Alumni Research Foundation (WARF), USA, where she has worked since 2002. WARF manages the patenting and licensing of the University of Wisconsin –Madison (UW). She is responsible for the licensing of a portfolio of life science research tool and biotechnology intellectual properties, including green technologies. She is a founder of the Association of University Technology Managers (AUTM) Women Inventors Committee.

Colette Henry is Head of the Department of Business Studies and Director of the EMeRGe Research Group at Dundalk Institute of Technology, Republic of Ireland. She is also Adjunct Professor of Entrepreneurship at UiT – The Arctic University of Norway. Professor Henry has published widely on entrepreneurship education, programme evaluation and gender. She is a fellow of the Higher Education Academy, the Institute for Small Business and Entrepreneurship (ISBE) and the Academy of Social Sciences, all in the UK. She holds the Sten K. Johnson European Entrepreneurship Education Award, and the Diana International Trailblazer award for her research on entrepreneurship and gender.

Nola Hewitt-Dundas is Head of Queen's Management School and Professor of Innovation Management and Policy at Queen's University Belfast, UK. Her research focuses on the dynamics of entrepreneurial and innovation ecosystems, technology transfer and evaluation of intervention to support university commercialization efforts. She has extensive consultancy experience with organizations including NESTA, the European Union and the World Bank.

Sándor Huszár is an Assistant Lecturer at the Faculty of Economics and Business Administration, and at the Knowledge Management Research Center, University of Szeged, Hungary; and former marketing manager of the Directorate for Research, Development and Innovation (technology transfer office) at the University of Szeged. His research interest focuses on commercialization channels of research and development activities, and on researchers' motivation and expectations in connection with the technology transfer process.

Linda Kawano has worked with early stage innovations in academic and commercial contexts for more than three decades. As Principal of GroupOptima, USA, she advises clients on asset management and conducts communication workshops for scientists. Her work with the Association of University Technology Managers dates back to 1990.

Leila Maria Kehl is a voluntary researcher working at Plug & Play as an International and Government Relations Associate. She establishes partnerships with governments worldwide and engages with start-ups to help them accelerate their business. After completing her innovation management and entrepreneurship master's programme at Birkbeck, University of London, UK, she moved to California in the USA where she contributed to various research projects led by the Triple Helix Institute.

Carol Kemelgor, LCSW, is a psychotherapist and psychoanalyst in private practice in New York. Her research on women in science and interpersonal relationships in academic research labs has been illuminated by contemporary psychoanalytic theory. She has conducted over 350 in-depth interviews with women in science in academia and is a co-author (with H. Etzkowitz and B. Uzzi) of *Athena Unbound: The Advancement of Women in Science* (Cambridge University Press, 2000). In addition she has written numerous journal articles about this subject.

Helen Lawton Smith is Professor of Entrepreneurship, Birkbeck, University of London, UK. She was the UK Principal Investigator on the UU TRIGGER project (2014–2017). Her research includes entrepreneurship and innovation with a special focus on universities and regional economic development. She was the first Chair of the Regional Studies Association Equalities and Diversities Committee in the UK.

Cheryl B. Leggon is an Associate Professor in the School of Public Policy at the Georgia Institute of Technology, USA. Her research underscores the criticality of disaggregating data by race/ethnicity and gender to develop policy, programmes and practices that enhance the quality of science

and engineering work forces. She was elected a Fellow of the American Association for the Advancement of Science (AAAS), and of Sigma Xi.

Jeanne Le Roux is an internationally experienced entrepreneur, associate lecturer, mentor and executive coach. Her specialities are people management, entrepreneurship and people innovation. She is a member of the TRIGGER team. She has also been a member of the Steering Committee of the Tech Talent Charter which outlines a series of key measures which aim to encourage organizations to think differently to encourage and support a more diverse tech workforce. Professionally she helps start-ups get their people management right.

Rebecca Lund is an Academy of Finland Postdoctoral Researcher at the Institute of Gender Studies, Faculty of Social Science, Tampere University, Finland. Her research interests are within the fields of institutional ethnography, gender and intersectionality in academia, epistemic disobedience, epistemic injustice in academic knowledge production, the sociology of neoliberalism, and feminist love studies. She is also the Chief Editor of *NORA: Nordic Journal of Feminist and Gender Studies*.

Paucic McGowan is Professor of Entrepreneurship and Business Development at the Ulster University Business School, UK. He has published more than 60 research publications and research case studies. He is a member of the Ulster University Business School's Research Institute and a Distinguished Business Fellow of the Ulster University in recognition of his work at the interface between the business practitioner community and the university. He is a Fellow of the Marketing Institute of Ireland; and Fellow of the Higher Education Association and a Fellow of the Institute for Small Business and Entrepreneurship (ISBE) in the UK.

Connie L. McNeely is a sociologist and Professor of Public Policy at George Mason University, USA, where she also is a Director of the Center for Science, Technology, and Innovation Policy, and Senior Research Fellow in the Center for Education Policy and Evaluation. Her research interests include science and technology policy, cultural analysis, globalization and international development, complex organizations and institutional analysis, comparative education, stratification and inequality, and social theory.

Viviana Meschitti is a Senior Lecturer in Management at the University of Huddersfield, UK. She is active in the field of organization studies. She has previously worked at Birkbeck, University of London, UK, on the TRIGGER project, with a focus on investigating gender differences along career pathways. She has longstanding experience in designing and implementing mentoring programmes to support early career researchers and

academics. Her work has been published in *Studies in Higher Education*, *Journal of Research in Gender Studies* and *Scientometrics*.

Lisa Messina is a Lecturer in Management at Queen's Management School, Queen's University Belfast, UK. Her research interests are in the fields of entrepreneurship, international business and innovation. In particular, her research focuses on the born global phenomenon in the context of university spin-out companies, entrepreneurial orientation, social capital and open innovation.

Alessandra Micozzi is an Assistant Professor in Business Administration and Business Organization, ECampus University, Italy. She was formerly a postdoctoral researcher at the Center of Innovation and Entrepreneurship, Università Politecnica delle Marche, Italy. She is Senior Researcher on the Women Entrepreneurship committee, Chamber of Commerce, Ancona. She is Working Packages (WP) Leader in the European Project CHETCH (China and Europe Taking Care of Healthcare Solutions).

Francesca Micozzi is a Research Fellow at the Centre for Innovation and Entrepreneurship at the Università Politecnica delle Marche, Italy. She is a contract lecturer in economics in business in Bachelor degree programmes. Her research interests include entrepreneurship, academic entrepreneurship, entrepreneurship education, high-tech industries and technology transfer.

Bill O'Gorman is Director for Research, Centre Enterprise Development and Regional Economy (CEDRE), School of Business, Waterford Institute of Technology, Republic of Ireland. His fields of research are entrepreneurial regions, regional development and entrepreneurship. Prior to joining academia in 1999, he was Managing Director of his own electronics subcontract business, and before that amassed more than 20 years' industry experience working at senior management and executive levels. He is also a Director of a number of enterprise support agencies, and serves on government fora for the development of enterprise policy and entrepreneurship education.

Aisling O'Neill is manager of the ArcLabs Research and Innovation Centre, Waterford Institute of Technology, Republic of Ireland. Aisling has many years of research experience examining ecosystems of research and innovation, incubator best practice, and learning network development. Her research interests include entrepreneurship, female entrepreneurship, innovation, regional development and networks. Aisling was President of the Network Ireland Waterford branch for 2017 and 2018, an organization supporting the personal and professional development of women.

Mark Panton worked as a Research Assistant on the TRIGGER project. His doctoral research focused on the use of sport stadiums in urban regeneration projects and he has recently co-authored a graphic book based on his thesis, together with a number of academic articles. He has worked in advertising, as a solicitor and is now a Lecturer at Birkbeck, University of London, UK. He has also been involved with a number of not-for-profit organizations, including as the Secretary of the Dulwich Hamlet Supporters' Trust, UK.

Ilenia Picardi is Assistant Professor in Sociology at the University of Naples Federico II (UNINA), Italy. Between 2013 to 2017, she was the project manager of the GENOVATE Project (FP7) for the UNINA research unit. Her research activity focuses on science and technology studies, mainly on issues related to the social impact of techno-science, environmental sustainability, intersectionality in scientific research and academia. Currently she is in charge of the Gender Studies in Science and Technology area at the Gender Observatory on University and Research at the same university.

Alexandra Poulouvassilis is Professor of Computer Science at the School of Business, Economics and Informatics (BEI), Birkbeck, University of London, UK; Director of the Birkbeck Knowledge Lab; and Deputy Dean with a research enhancement remit in the School of BEI. Her research is in the design of specialist data and knowledge bases to support learning communities, and the development of search, analysis and visualization tools for such resources, working in collaborative interdisciplinary projects with domain experts from education, the arts, social sciences and sciences. The goal of such research is to effectively support communities in capturing, organizing, discovering and sharing knowledge.

Szabolcs Prónay is an Associate Professor at the Institute of Business Studies of the Faculty of Economics and Business Administration, and former marketing manager of the Directorate for Research, Development and Innovation (technology transfer office) at the University of Szeged, Hungary. He works as a marketing consultant for several business and management consulting firms. He is a founding member of the Innovation Club at the university. His research interests includes consumer behaviour, knowledge management and science to business (S2B) marketing.

Peter Rogerson is SUNY Distinguished Professor of Geography at the State University of New York at Buffalo (SUNY-Buffalo), USA. His interests are in the areas of population geography, spatial analysis and spatial statistics. He is the author of *Statistical Methods for Geography*

and a co-author of *Statistical Detection and Surveillance of Geographic Clusters*.

Sue Rosser is the Special Advisor for Research Development and External Partnerships for the California State University System Office of the Chancellor, USA, after serving from 2009–2016 as Provost at San Francisco State University, USA. From 1999 to 2009 she was the Dean at Georgia Tech, USA and held the endowed Ivan Allen Dean's Chair of Liberal Arts and Technology. She is the author of 14 books and more than 130 journal articles on theoretical and applied aspects of women, science, health and technology.

Katie Seely-Gant is a Policy Fellow and Research Associate at George Mason University, USA, in the Schar School for Policy and Government. She previously served as a research analyst at the Energetics Technology Center, USA. Her research interests include science and technology workforce and career pathways, computational methods, programme evaluation, diversity and inclusion in technical workforces, international and domestic teams, and mentoring.

Jennifer Shockro is Assistant Director for Technology Transfer at the California Institute of Technology, USA. She works closely with faculty and researchers to provide advice on start-ups, patenting, licensing and other intellectual property issues. Prior to joining the Caltech Office of Technology Transfer and Corporate Partnerships she worked for ten years as an engineer with lasers, optical and flight systems, and computer design. She is a registered United States patent agent.

Kathleen Sohar is the Director for the Collaboratory for Women Innovators at UF Innovate, University of Florida, USA. She was an early employee at two technology start-ups and has extensive experience within incubation and commercialization sectors. She is a past Chair of the Association of University Technology Managers (AUTM) Women Inventors Committee and a co-founder of the Empowering Women in Technology Startups Program (EWITS).
