About the editors

François Thérin is currently Head of the Taylor's Graduate School of Management at Taylor's University in Malaysia. He has previously held similar Dean's or Director's positions in business schools in France, Oman and the UAE. François is the founding editor of the *International Journal for Technoentrepreneurship* and the editor of the previous editions of this Handbook. He has a Master's in Management from Toulouse Business School (France), an MPhil from IAE d'Aix-en-Provence (France) and a Doctorate in Business Administration from Newcastle University (UK).

Francesco Paolo Appio is an Associate Professor of Innovation at SKEMA Business School, Université Côte d'Azur, France (Paris La Défense, France). He received his PhD in Management at Scuola Superiore Sant'Anna in Italy. In recent years he has been visiting important international academic institutions such as Bocconi University (Italy), MIT Sloan School of Management (USA), and KU Leuven (Belgium). His main research interests revolve around paradoxes and tensions in innovation management, investigated at the micro (individual, team), meso (firm, industry) and macro level (ecosystem, city). He has recently been appointed a member of the editorial board for the journals *Technological Forecasting and Social Change* and *IEEE Transactions on Engineering Management*. His research has been published in *Long Range Planning*, *Technological Forecasting and Social Change*, *International Journal of Production Research* and *Industrial Marketing Management*, among others. He is guest editor of multiple special issues in journals such as *Journal of Product Innovation Management*, *Organization Studies*, *Technological Forecasting and Social Change*, *IEEE Transactions on Engineering Management* and *Journal of Urban Technology*.

Hyungseok (David) Yoon is an Assistant Professor of International Business at The University of Leeds. Before joining academia, he worked as a consultant for a number of international development and management consulting projects with Inter-American Development Bank, Mercer and Accenture. He earned a PhD in Management from KAIST (Korea Advanced Institute of Science and Technology). He is heavily involved in collaborating with scholars in international business and innovation around the globe. His current research interests are social evaluations and entrepreneurship in knowledge-intensive industries, liability of foreignness

in international business, and technological innovation and learning in mega-projects. His recent work has been published (or is forthcoming) in leading journals such as *Research Policy* and *Journal of Business Research*. His academic publications have featured in *London School of Economics Impact Blog* and *Harvard Business Review France*.
