Contributors

**Michael Bauder** is a post-doctoral research associate at the Institute of Environmental Social Sciences and Geography, University of Freiburg, Germany. Since 2011 he has worked primarily on GIS and GIScience, tourism geography, and mobility, focusing among other things on GPS tracking methods and their implementation in a social science perspective. Beginning in 2014 he extended his research to the emerging fields of digital geography, VGI/AGI and Big Data, including processes of digitization of society and research.

**Patrick Brouder** is a researcher at Vancouver Island University, Canada, as well as a research associate at the University of Johannesburg, South Africa. He is a member of the editorial boards of *Tourism Geographies* and *Polar Geography*. He serves as chair of the Canadian Association of Geographers’ Economic Geography Group and on the steering committee of the International Polar Tourism Research Network. His research interests are tourism and economic geography.

**Rita de Cássia Ariza da Cruz** holds a Ph.D. in human geography and professor at the Department of Geography, Faculty of Philosophy, Literature and Human Sciences of the University of São Paulo, Brazil. She is the author of several books, book chapters and articles on the geography of tourism. Her main topics of interest are the political economy of tourism, tourism public policies, and the relationship between tourism and the production of space.

**Keith Debbage** is a joint professor in the Department of Geography, Environment and Sustainability, and the Department of Marketing, Entrepreneurship, Hospitality and Tourism at UNC Greensboro, USA, with research interests in urban economic development and entrepreneurship, tourism and the airline industry. He is the author of over 70 research publications in book chapters, contracted reports and various academic journals including the *Annals of Tourism Research*, the *Journal of Air Transport Management*, the *Journal of Transport Geography*, *Tourism Management* and *Urban Geography*.

**Martin G. Gren** holds a Ph.D. in human geography from the University of Gothenburg, Sweden and is associate professor at Linnaeus University, Sweden. His research interests focus on the re-conceptualization of the Earth in the Anthropocene, and the possibilities for terrestrial politics in the new climatic regime. He has authored and edited books, as well as published articles in journals.
C. Michael Hall is a professor at the University of Canterbury, New Zealand, docent in the Department of Geography, University of Oulu, Finland, and a visiting professor in the School of Business and Economics, Linnaeus University, Sweden. His Ph.D. is in geography from the University of Western Australia, and he has received honorary doctorates from the universities of Lund, Oulu and Umeå. He is co-editor of *Current Issues in Tourism*, and has published widely on tourism, regional development, world heritage, environmental change, and food, wine and gastronomy.

Hörður V. Haraldsson is a future analyst at the Swedish Environmental Protection Agency. He has a background in geology and environmental sciences as well as a Ph.D. in system dynamic modelling from the Faculty of Engineering at Lund University, Sweden. He has worked on many cross-disciplinary system dynamic projects and has a demonstrated history from environmental research and public policy analysis within governmental agencies. Tourism has always been an area of interest owing to its interdisciplinary nature of global trends and local impacts.

Edward H. Huijbens holds a B.Sc. in geography from the University of Iceland and an MA and fully funded Ph.D. in cultural geography both from Durham University, UK. As well as completing the Ph.D., he taught and did research at the University of Iceland. He assumed directorship of the Icelandic Tourism Research Centre from 2006 and a professorship at the University of Akureyri, Iceland in 2013. As of 1 February 2019 Edward will chair Wageningen’s University cultural geography research group. He has authored monographs, chapters in edited volumes and articles in numerous scholarly journals both domestically and internationally.

Zainub Ibrahim is a professor at Algonquin College’s School of Hospitality and Tourism, Canada. She holds a Ph.D. in geography from the University of Waterloo, Canada and specializes in issues surrounding tourism planning. Her research interests can broadly be stated as how tourism is negotiated in the spaces it occupies. Some of her past research studies include retirement migration among Canadian snowbirds in Florida, creating a framework for evaluating national-level tourism plans, and assessing tourism sustainability issues along Egypt’s Red Sea coast.

Dimitri Ioannides, Ph.D. is a chaired professor of human geography at Mid Sweden University, where he also serves as the director of the European Tourism Research Institute (ETOUR). Previously he worked at Missouri State University, USA. Having conducted research on tourism and sustainability and also the economic geography of tourism for more than two decades he has recently begun investigating the labour geographies of tourism workers.

Dieter K. Müller is a professor of social and economic geography, Department of Geography, and deputy vice-chancellor, Umeå University, Sweden. He has a longstanding research interest in second-home tourism but also now works on various aspects of tourism development in peripheral areas and the Arctic in particular. He has published widely in the field and serves on the editorial boards of *Tourism*.
CONTRIBUTORS

Geographies, Current Issues in Tourism and the Scandinavian Journal of Hospitality and Tourism. Since 2012 he has been chairperson of the IGU Commission for the Geography of Tourism, Leisure and Global Change.

Rannveig Ólafsdóttir is a professor of geography and tourism at the Faculty of Life and Environmental Sciences at the University of Iceland. Her research largely focuses on the interrelationship between tourism and the environment, including tourism environmental impact, tourism spatio-temporal modelling, wilderness mapping, tourism and climate change, geotourism, public participation, and determining sustainability indicators for tourism management.

Jarkko Saarinen is a professor of geography at the University of Oulu, Finland, and distinguished visiting professor at the School of Tourism and Hospitality, University of Johannesburg, South Africa. His research interests include tourism and development, sustainability in tourism, tourism and climate change adaptation, tourism–community relations, and wilderness studies. He is editor of the journal Tourism Geographies. His recent publications include co-edited books: Political Ecology and Tourism (2016), Borderless Worlds for Whom? (2019) and Resilient Destinations and Tourism (2019).

Robert Steiger is a geographer and is assistant professor at the Department of Public Finance at University of Innsbruck, Austria. His research focus in the last 15 years has been climate change and tourism, and he contributed to the national climate change assessment reports of Switzerland and Austria. His current research interests cover tourism and sustainable regional development, impacts of climate change on destinations and tourists’ behavioural changes, and resilience of tourism regions to natural hazards.

Rémy Tremblay is a full professor at TELUQ, Canada, the University of Quebec’s distance learning institution. His work investigates the many dimensions of the North American city, mostly how it is perceived and experienced. From 2005 until 2015, he was a Canada research chair on the quality of life of knowledge-based cities. For more than 25 years he has been conducting research and writing on the seasonal migration of Quebec residents to the region of Miami, USA.

Gustav Visser obtained his Ph.D. at the London School of Economics and Political Science, UK. He joined the University of the Witwatersrand, South Africa in 2000 as a post-doctoral fellow. In 2002 he was appointed lecturer in the Department of Geography at the University of the Free State, South Africa, where he became a professor in 2009. In 2015 he was appointed professor of geography at Stellenbosch University, South Africa. His main research interests concern identity-based consumption and urban morphological change.

Yuefang Wu is a lecturer in the Department of Finance and Management at the Foshan Polytechnic College, China. Her research interests include tourism and retirement mobilities, second homes and intangible cultural heritage.

Honggang Xu is a professor in the School of Tourism Management at the Sun Yat-sen University, China. Her research interests include tourism development,
tourism mobilities, and health and well-being in tourism, and she has published widely in leading international journals with her students and colleagues in China and abroad. She is a co-editor of *Tourism Geographies*.

**Kristina Zampoukos** is an assistant professor in human geography in the Department of Tourism Studies and Geography, Mid Sweden University. Her research interests mainly focus on labour and labour geographies, with a particular interest in theorizing the working body, the socio-spatial divisions of labour, labour (im)mobilities, and (worker) agency.
