Contributors

Justin Alger is a postdoctoral fellow at the University of British Columbia (UBC), cross-appointed at the Phil Lind Initiative and the Sauder School of Business. His work focuses on the political economy of marine conservation, examining the relationship between marine resource use and government policy. He has published several articles and book chapters on the subject, with a book in progress titled *Conserving the Oceans: The Politics of Large Marine Protected Areas*. His research has recently appeared in *Environmental Policy and Governance* and *Pacific Affairs*. He is a postdoctoral teaching fellow at the School of Public Policy and Global Affairs and in the Department of Political Science at UBC. He teaches courses in introductory methods, global politics, and global environmental politics.

Timothy Adivilah Balag’kutu is a PhD candidate in Global Governance and Human Security in the John W. McCormack Graduate School of Policy and Global Studies, University of Massachusetts Boston. His doctoral research examines interactions between actors and processes of intergovernmental organizations and transnational advocacy networks in global mercury governance under the Minamata Convention. His research interests include the intersections of environmental politics and natural resource governance, sustainable development and democratization in Africa. He recently contributed to a special issue of *Extractive Industries and Society* assessing a decade of the Extractive Industries Transparency Initiative (EITI), as well as the *Routledge Handbook of Environmental Conflict and Peacemaking*, edited by Ashok Swain and Joakim Ojendal (2018). He is an adjunct lecturer at Babson College, Massachusetts, where he teaches Global Environmental Activism and Introduction to Contemporary Africa.

Harriet Bulkeley is a professor of geography at Durham University. Her research is concerned with the nature and politics of environmental governance, and she has particular expertise in the areas of climate change, energy, and urban sustainability. She has published seven books, several edited collections and over 60 academic papers. Her recent books include An Urban Politics of Climate Change (Routledge, 2015) and Accomplishing Climate Governance (Cambridge University Press, 2016). She currently convenes the H2020 NATURVATION project examining urban innovation with nature-based solutions for sustainable development. Her current work on climate governance includes the H2020 REINVENT project examining the politics of decarbonization in energy-intensive systems of production and consumption and continued research on the politics and practice of climate/smart cities in the UK, Sweden, and Australia. In 2014, she was awarded the King Carl XVI Gustaf’s Professorship in Environmental Science.

Mark Cooper is a postdoctoral researcher in political science at Lund University and an assistant professor of geography at the University of California, Davis. His current research includes the politics and policy of climate change mitigation, the governance of climate finance, and the decarbonization of emissions-intensive industries such as agriculture, plastics, and steel. His research has appeared in Climate Policy, Environment and Planning A, Journal of Rural Studies, and Society and Natural Resources.

Peter Dauvergne is a professor of international relations at the University of British Columbia, specializing in global environmental politics. His current research covers the politics of corporations, consumption, and social movements, especially the consequences for ecological change in the global South. His books include Will Big Business Destroy Our Planet? (Polity, 2018), Environmentalism of the Rich (MIT Press, 2016, winner of the Michael Harrington Book Award), Protest Inc. (with Genevieve LeBaron, Polity, 2014), Eco-Business (with Jane Lister, MIT Press, 2013), Paths to a Green World (with Jennifer Clapp, 2nd edition, MIT Press, 2011), Timber (with Jane Lister, Polity, 2011), and The Shadows of Consumption (MIT Press, 2008, winner of the Gerald L. Young Book Award). He is the founding and past editor of the journal Global Environmental Politics.
Elizabeth R. DeSombre is the Camilla Chandler Frost Professor of Environmental Studies at Wellesley College, where she directs the Environmental Studies program. Her research focuses primarily on cooperation to address problems of the global commons, especially oceans, but she has also worked on determinants of environmental behavior. She has published seven books, the most recent of which is *Why Good People Do Bad Environmental Things* (Oxford University Press, 2018), and won two book prizes.

Lars H. Gulbrandsen is a research professor and the deputy director at the Fridtjof Nansen Institute in Oslo. His main research interests are within the fields of global environmental politics and international political economy, with a particular focus on the rise and evolution of private governance and authority. He is the author of *Transnational Environmental Governance: The Emergence and Effects of the Certification of Forests and Fisheries* (Edward Elgar Publishing, 2010). His most recent books are *Linking EU Climate and Energy Policies* (co-authored with Jon Birger Skjærseth, Per Ove Eikeland, and Torbjørg Jevnaker, Edward Elgar, 2016) and *The Evolution of Carbon Markets: Design and Diffusion* (co-edited with Jørgen Wetttestad, Routledge, 2018).

Matthew Hoffmann is a professor of political science at the University of Toronto. He is also the co-director of the Environmental Governance Lab at the Munk School of Global Affairs and co-editor of the journal *Global Environmental Politics*. His research and teaching interests include global environmental governance, climate change politics, and international relations theory. He is the author of *Climate Governance at the Crossroads: Experimenting with a Global Response after Kyoto* (Oxford University Press, 2011) and *Ozone Depletion and Climate Change: Constructing a Global Response* (SUNY Press, 2005) and one of multiple co-authors of *Transnational Climate Politics* (Cambridge University Press, 2014). His current project is exploring the politics of decarbonization.

Sonja Klinsky is an assistant professor at Arizona State University’s School of Sustainability. Her work focuses on justice issues in the context of climate change at multiple scales, including within domestic and international governance arenas. Through this research trajectory she has collaborated with a variety of nongovernmental and policy–science interface organizations to more fully engage with the lived challenges of designing and implementing climate policies. Her most recent work is *The Global Climate Regime and Transitional Justice* (with Jasmina Brankovic, Routledge, 2018).

Jason J. McSparren is a PhD candidate in the Global Governance and Human Security program at the McCormack Graduate School of Policy and Global Studies, University of Massachusetts Boston. He is also a pre-doctoral fellow (2017–18) for the West African Research Association (WARA). His dissertation research investigates the political-institutional norms of governance at the state and sub-state levels of natural resource governance in Mali (forthcoming 2018).
Kate J. Neville is an assistant professor at the University of Toronto, cross-appointed to the Department of Political Science and the School of the Environment. Her research brings together political economy and social movement scholarship to investigate the intersection of global markets and local places, with a focus on energy resources. Her recent work has centered on contestation over hydraulic fracturing (“fracking”), with articles published in the Annual Review of Environment and Resources (2017), Environmental Politics (2016), and Review of Policy Research (2016).

Susan Park is an associate professor in international relations at the University of Sydney. She focuses on how state and nonstate actors use formal and informal influence to make international organizations, particularly multilateral development banks, greener and more accountable. She has published in numerous journals, most recently Review of International Political Economy. Her book The World Bank Group and Environmentalists: Changing International Organisation Identities was published by Manchester University Press in 2010, and she has co-edited two books. She is co-convener with Teresa Kramarz of the Earth System Governance Task Force on Accountability in Global Environmental Governance.

J. Timmons Roberts is the Ittleson Professor of Environmental Studies and Sociology at Brown University, where he directs the Climate and Development Lab in the Institute at Brown for Environment and Society. He is also a non-resident senior fellow at the Brookings Institution. His work examines the role of equity...
in efforts to address climate change. At the international level, he has conducted research for 15 years on the UNFCCC climate negotiations, with two MIT Press co-authored books published in 2015: *Power in a Warming World*; and *Fragmented Continent*. He is a leader in local efforts in Rhode Island to address climate change, and is conducting new research on the flows of funding and discourses for and against climate action in the United States.

**Phoebe Stephens** is a PhD candidate in the School of Environment, Resources and Sustainability at the University of Waterloo. Her current research focuses on the relationship between financial investment patterns and sustainability in the food system. She previously worked in environmental advocacy, and her published work has appeared in *Globalizations* and *International Affairs Review*.

**Johannes Stripple** is an associate professor at the Department of Political Science, Lund University. His research is concerned with the critical politics of climate change and its governance through a range of sites, from the insurance industry to carbon markets, and from the UN to the urban and the everyday. He has published over 40 books, papers, and articles, including two edited volumes with Cambridge University Press: *Governing the Climate: New Approaches to Rationality, Politics and Power* (co-edited with Harriet Bulkeley, 2014); and *Towards a Cultural Politics of Climate Change: Devices, Desires and Dissent* (co-edited with Harriet Bulkeley and Matthew Paterson, 2016).

**Stacy D. VanDeveer** is a professor of global governance and human security at the McCormack Graduate School of Policy and Global Studies, University of Massachusetts Boston. He previously served as chair of political science, program chair for the sustainability dual major, and co-chair of the Academic Program Committee for the University of New Hampshire’s Carsey School of Public Policy. His research interests include EU environmental and energy politics, global environmental policymaking and institutions, comparative environmental politics, connections between environmental and security issues, the roles of expertise in policymaking, and the global politics of resources and consumption. In addition to authoring and co-authoring almost 100 articles, book chapters, working papers, and reports, he has co-edited or co-authored ten books, including *European Union and Environmental Governance* (Routledge, 2015), *Waste, Want or War?* (Routledge, 2015), *Transnational Climate Change Governance* (Cambridge University Press, 2014), and *Comparative Environmental Politics* (MIT Press, 2012). He co-edited the journal *Global Environmental Politics* (MIT Press) from 2012 to 2017.

**Erika Weinthal** is the Lee Hill Snowdon Professor of Environmental Policy at the Nicholas School of the Environment at Duke University. She specializes in global environmental politics with an emphasis on water and energy. Her book *State Making and Environmental Cooperation: Linking Domestic Politics and International Politics in Central Asia* (MIT Press, 2002) was the recipient of the 2003 Chadwick Alger Prize and the 2003 Lynton Keith Caldwell Prize. She co-authored *Oil Is Not a Curse* (Cambridge University Press, 2010), and co-edited...
Water and Post-conflict Peacebuilding (Earthscan, 2014) and The Oxford Handbook on Water Politics and Policy (Oxford University Press, 2018). She is a member of the UNEP Expert Group on Conflict and Peacebuilding and an editor of the journal Global Environmental Politics. In 2017 she was a recipient of the Women Peacebuilders for Water Award under the auspices of Fondazione Milano per Expo 2015.
