The green market transition

**Economic theory**
- Behavioural change impacts 22
- Energy taxes 22–3

**Elcogás case** 150

**Electricity generation sector**
- Demand trends 97
- EU carbon leakage impacts, by sector 36–9
- Fossil fuel subsidies 100
- Renewable energy share, and 98–101, 105–10

**Emission tax payment credits (ETPC)** 82–3

**Emissions trading schemes, generally**
- See also EU Emissions Trading System
- Carbon taxes, compared 79–80
- Linkages between 78–9

**Energy sector**
- See also renewable energy demand trends 97
- EU carbon leakage impacts, by sector 36–9
- EU regulatory development 19–20, 25–7

**Environment, generally**
- Definition 250–51
- Human vs natural 250–52
- Landscape and heritage 250–51

**Environmental policy, generally**
- Autonomy, role of 238–40, 243
- Low-carbon initiatives, in EU 240–42
- Performance vs expectation 193
- Taxation role in 257–8, 263

**Environmental taxes**
- See green taxation

**Estonia**
- Vehicle taxes 23

**EU Emissions Trading System**
- Carbon taxes linkages 78–9
- Accounting adjustments 89
- Accounting flaws 86
- Allowance over-allocation 85
- Benefits 89–90
- Carbon pricing, and 79–80
- Climate impacts 81–4
- Cooperative approaches 87–8
- Crediting mechanisms 83–5
- Crediting non-additionality 85
- Direct one-way links 80–82, 86–8
- Direct two-way links 82–3, 86–8

**Double counting** 86, 89
- Economic impacts 81–2, 84
- Emission tax payment credits (ETPC) 82–3
- Environmental risks 84–9
- Indirect links 83–5, 87–8
- Internationally transferred mitigation outcomes (ITMOs) 87
- Non-permanence 85–6
- Options 80–84
- Over-crediting 86
- Overselling 86–7
- Paris Agreement mechanisms 86–90
- Political impacts 81–4
- Sustainable Development Mechanism (SDM) 88–9
- Transparency 89
- Performance vs expectations 193

**European Union**
- See also EU
- Emissions Trading System
- Biodiversity Strategy 261
- Electricity networks
- Energy Taxation Directive, and 144, 146–8
- Indirect taxation 146–7
- Market-based instruments role in 143–4, 147–53
- Operation structure 143
- Special purposes financing 144–6
- State aid prohibition, and 143–52
- Supply, separation from 143
- Tax relief, validity 147–8

**Emissions regulation, generally**
- Energy taxation proposals 17
- Fuel taxes in Member States 18–22
- Market-based instruments 17
- Private sector 17
- Transport sector instruments 17–18
- Vehicle taxes 22–5

**Energy taxes**
- Basis for 26–7
- Trends 18–21

**Non-Emissions Trading System (non-ETS)** 21

**Renewable energy**
- Regulatory proposal 26

**Resource efficiency policy**
