<i>List of contributors</i>	vii
<i>Introduction</i>	ix
PART I BIOBANKS, BIG DATA, AND MODES OF COLLABORATION	
1 Big Data and the ethics of detail: the role of ethics work in the making of a cross-national research infrastructure for genetic research <i>Klaus Hoeyer, Aaro Tupasela, and Malene Bøgehus Rasmussen</i>	2
2 Biobanks as knowledge institutions <i>Michael J. Madison</i>	22
PART II BIOBANKS, TRANSLATIONAL MEDICINE, AND TECH TRANSFER	
3 Biobanks as innovation infrastructure for translational medicine <i>W. Nicholson Price II</i>	42
4 Responsible use of human biosamples in the bioscience industries <i>Brian J. Clark and Tina Bossow</i>	56
PART III THE INTERFACE OF BIOBANKS, HUMAN RIGHTS, AND PATIENT INVOLVEMENT	
5 Biobanking, scientific productions and human rights <i>Peter K. Yu</i>	73
6 <i>You told me, right?</i> Free and informed consent in European patent law <i>Åsa Hellstadius and Jens Schovsbo</i>	92
7 Dynamic Consent and biobanking: a means of fostering sustainability? <i>Jane Kaye and Megan Pricor</i>	117

8	Generating trust in biobanks within the context of commercialization: can Dynamic Consent overcome trust challenges? <i>Esther van Zimmeren</i>	130
9	Exploitation and vulnerabilities in consent to biobank research in developing countries <i>Nana Cecilie Halmsted Kongsholm</i>	156
10	Biobanking and the consent problem <i>Timothy Caulfield and Blake Murdoch</i>	173
PART IV BIOBANKS, GUIDELINES, AND GOOD GOVERNANCE		
11	Responsible research and innovation and the advancement of biobanking and biomedical research <i>Helen Yu</i>	186
12	Do we need an expiration date for biobanks? <i>Franziska Vogl and Karine Sargsyan</i>	216
13	Biobanks and biobank networks <i>Eva Ortega-Paíno and Aaro Tupasela</i>	229
14	IP policies for large bioresources: the fiction, fantasy, and future of openness <i>Kathleen Liddell, Johnathon Liddicoat, and Matthew Jordan</i>	242
	<i>Index</i>	264
