---

2.1	Demographic characteristics of interviewed male and female entrepreneurs (in 2012, in % unless otherwise indicated)	20
2.2	Sources of entrepreneurial support and start-up capital	21
2.3	Networks, start-up capital, and sales: OLS regressions, new and all owner samples	23
2.4	Networks, human capital and the level of start-up capital: OLS regressions	25
2.5	Networks and composition of start-up capital (new owners): probit regressions	26
2A.1	Description of variables	31
3.1	Classification of the information from interviews	41
4.1	Comparing urban and rural entrepreneurial environments	56
4.2	Typology of policy areas for supporting high-growth firms	60
5.1	Faculty profiles and areas identified for inclusive improvement as at 31 March 2017	98
5.2	Specific equity measures by faculty	99
6.1	Mean, standard deviation, and correlation matrix	119
6.2	Effects of gender and regulations on future job expectations	124
7.1a	Factor analysis results for entrepreneurial intention	143
7.1b	Factor analysis results for HGEs capital	144
7.2	Regression analysis results	149
7.3	Test of statistically significant differences in regression coefficients	151

8.1	Definitions and measurements of the variables	169
8.2	Characteristics of the samples	171
8.3	Descriptive statistics and Pearson correlation matrix	174
8.4	Logit analysis predicting the probability of debt usage	176
8.5	Tobit analysis explaining the debt ratio	177
