<i>List of contributors</i>	viii
1 Introduction to the <i>Handbook of Research Methods on the Quality of Working Lives</i> <i>Daniel Wheatley</i>	1
PART I RESEARCHING THE QUALITY OF WORKING LIVES: PHILOSOPHICAL, CONCEPTUAL AND PRACTICAL CONSIDERATIONS	
2 Generating and measuring impact: insights from research on the quality of working lives <i>Carol Atkinson</i>	19
3 Using a lifecourse approach to research patterns of paid and unpaid work <i>Irene Hardill and Daniel Wheatley</i>	33
4 Reviewing measurement instruments in job insecurity research: perceived job insecurity and the gender lens perspective <i>Pinar Bayhan Karapinar, Selin Metin Camgöz and Ozge Tayfur Ekmekci</i>	46
5 Accessing and understanding autism spectrum conditions in the workplace <i>Anne Cockayne</i>	62
6 Research ethics and the “elephant in the room”: encountering violence in fieldwork concerning unpaid labour <i>Irene Sotiropoulou</i>	79
PART II QUALITATIVE RESEARCH METHODS ON THE QUALITY OF WORKING LIVES	
7 Accessing ‘hard to reach groups’ and emotions in the research process: ‘work an honest day and get the usual raw deal’ <i>Andrew Smith and Jo McBride</i>	95

vi	<i>Handbook of research methods on the quality of working lives</i>	
8	Using discursive methods to research the quality of working lives <i>Cath Sullivan</i>	109
9	Observing neo-villeiny and other forms of non-standard work <i>Geraint Harvey</i>	124
10	Ethnographic methods with limited access: assessing quality of work in hard to reach jobs <i>Adam Badger and Jamie Woodcock</i>	135
11	Using case study research to capture the quality of working lives <i>John Burgess and Julia Connell</i>	147
12	Combining gendered strategies, a narrative approach and coaching: examining the effect of behavioural ambidexterity on individual well-being and high performance work <i>Ani Raiden and Christine Räisänen</i>	163
PART III QUANTITATIVE RESEARCH METHODS ON THE QUALITY OF WORKING LIVES		
13	Effective use of secondary quantitative data sources <i>Chris Lawton</i>	177
14	Secondary data analysis of large survey data: researching the quality of paid and unpaid working lives <i>Tracey Warren</i>	194
15	Quantitative methods of examining the impact of the physical work environment <i>Elizabeth (Libby) J. Sander, Alannah E. Rafferty and Peter J. Jordan</i>	207
16	Using the Oaxaca–Blinder decomposition to quantitatively assess the gender pay gap <i>Michaela Fuchs, Anja Rossen, Antje Weyh and Gabriele Wydra-Somaggio</i>	224
17	Econometric analysis of educational mismatch and earnings using survey data from Ghana <i>Christian K. Darko and Kennedy K. Abrokwa</i>	235

PART IV MIXED METHODS RESEARCH ON THE
QUALITY OF WORKING LIVES

18	Use of quantitative and qualitative methods to research migrant workers in low-skilled work <i>Anne Green</i>	254
19	Conducting small scale primary mixed methods research into the impacts of work-related travel <i>Craig Bickerton</i>	268
20	Evaluating new techniques of evidence-based management using narrative evidence synthesis <i>Adrian Madden, Catherine Bailey, Luke Fletcher and Kerstin Alfes</i>	282
21	Using occupational history calendars in semi-structured interviews to capture long working lives: a small sample approach using sequence analysis <i>Fiona Carmichael, Jo Duberley and Lorna Porcellato</i>	301
	<i>Index</i>	319
