Editors and contributors

All of the contributors are recognised or emerging researchers in research and practice in transport, city planning and social equity. Many of us have worked together previously on research projects and/or through the NECTAR research network (www.nectar-eu.eu/). Short biographies are given below.

EDITORS

Robin Hickman is a Reader (Associate Professor) at the Bartlett School of Planning (BSP), University College London and Director of the MSc in Transport and City Planning. He has been a Visiting Research Associate and Research Fellow at the Transport Studies Unit, University of Oxford. He worked in consultancy as an Associate Director at Halcrow, leading on transport research; and previously at Llewelyn Davies and Surrey County Council. He completed his PhD at the BSP in 2007. He co-chairs Cluster 1 of the NECTAR network and writes a regular column in the Town and Country Planning journal.

He has research interests in transport and climate change, transport and social equity, urban structure and travel, integrated transport and urban planning strategies, the affective dimensions of travel, discourses in travel, multi-criteria appraisal and sustainable transport strategies in the UK, Europe and Asia. His most recent books are Handbook on Transport and Development (Edward Elgar, 2015) and Transport, Climate Change and the City (Routledge, 2014).

Beatriz Mella Lira is a PhD candidate and Research Assistant at the Bartlett School of Planning, UCL. She is an Architect with a Master's degree in Urban Development from P. Universidad Catolica de Chile. Her research interests are in urban planning, transport planning, well-being, social equity, the Capability Approach and multi criteria appraisal. Her PhD research is sponsored by Becas Chile and examines transport and social equity in Santiago, Chile.

Beatriz has worked as a Visiting Lecturer at University of Westminster and Teaching Assistant at UCL. She was Research Assistant for the British Council Newton Fund research project ‘Sustainable Cities and Resilient Transport’ (2014–2017). She has worked in private consultancy as External Consultant at the OECD (2017) and Project Manager at Urbanica Consultores (2011–2014) in projects related to accessibility, master planning and land use, sustainable transport, communication infrastructure and urban design. She leads the Socially Just Transport Doctoral Research Network.

Moshe Givoni is Head of the Transport Research Unit (TRU) and Associate Professor at the Department of Geography and Human Environment, Tel Aviv University. He is also a Visiting Research Associate at the TSU, University of Oxford and an Associate Editor.
for the journal Transport Reviews. He gained his PhD at the Bartlett School of Planning, University College London, in 2005, and received a Marie Curie postdoctoral fellowship which was undertaken at the VU University, Amsterdam. He co-chairs Cluster 1 of the NECTAR network.

His research interests are in the field of transport and mobility with focus on transport policy and planning; the links between transport and economic development; and transport and the environment. Most of his research is on public transport systems, and rail and high-speed rail in particular. His most recent books include The Handbook on Transport and Development (Edward Elgar, 2015), Moving Towards Low Carbon Mobility (Edward Elgar, 2013) and Integrated Transport: from Policy to Practice (Routledge, 2010).

**Karst Geurs** is Full Professor of Transport Planning at the Centre for Transport Studies (CTS), University of Twente. His research focuses on interactions between land use and transport, accessibility modelling and evaluation and the dynamics in travel behaviour. From 2009–2013 he was Associate Professor at the CTS. He worked at the National Institute for Public Health and Environment from 1997 and moved to the Netherlands Environmental Assessment Agency in 2005. In 2006, he received his PhD at the Faculty of Geosciences, Utrecht University, the Netherlands, on accessibility appraisal of land use and transport policy strategies. He teaches Master’s courses on Transport Policy and Planning, Land Use and Transport Interactions and Sustainable Transport within the Master Track Transport Engineering and Management.

He is chair of the Network on European Communications and Transport Activities Research (NECTAR), Editor-in-Chief of the European Transport Research Review (ETRR) and a member of the Editorial Advisory Board of the Journal of Transport and Land Use (JTLU). His most recent books include Accessibility, Equity and Efficiency. Challenges for Transport and Public Services (Edward Elgar, 2016) and Accessibility Analysis and Transport Planning. Challenges for Europe and North America (Edward Elgar, 2012).

**CONTRIBUTORS**

**Nihan Akyelken** is an Associate Professor in Sustainable Urban Development at the University of Oxford. Nihan joined Oxford as a Research Fellow at the Transport Studies Unit, School of Geography and the Environment, in 2008. Previously, she worked at the London School of Economics and Political Science (LSE) Public Policy Group. She obtained her PhD in Economic Geography from the University of Oxford, and her undergraduate and Master's degrees from the LSE in the areas of Economics and Philosophy and European Political Economy. She has worked on research projects funded by the European Commission, the UK Research Councils, the Swedish International Development Agency, the British Council and the British Academy, and held academic awards from Wolfson College, Alan Nesta Ferguson Foundation and the LSE Award Schemes. She is the winner of the 2015 OECD-ITF Young Researcher of the Year Award and was named as a World Social Science Fellow in Sustainable Urbanisation by the
International Social Science Council in 2014. Situated at the intersection of economic and social geography, development planning and political economy, Nihan’s research focuses on mobility-related inequalities and the wider impacts of transport infrastructure investments.

David Banister is Professor Emeritus of Transport Studies at the University of Oxford. From 2006–2015, he was the Director of the Transport Studies Unit, University of Oxford, and Director of the Environmental Change Institute, University of Oxford (2009–2010). Prior to 2006, he was Professor of Transport Planning at University College London. He has spent time as a Research Fellow at the Warren Centre in the University of Sydney (2001–2002), a Visiting VSB Professor at the Tinbergen Institute in Amsterdam (1994–1997), and Visiting Professor at the University of Bodenkultur in Vienna in 2007. He was the first Benelux BIVEC-GIBET Transport Chair (2012–2013) and was the Chair of the ERC Advanced Research Grants SH3 Panel (2015–2016). He has edited the journal Transport Reviews for 20 years and has published 25 books and over 300 papers in refereed journals. His two latest books are Inequality in Transport (Alexandrine Press, 2018) and The Imperatives of Sustainable Development: Needs, Justice, Limits (Routledge, 2017).

Christine Benna Skytt-Larsen is Assistant Professor in social geography at the University of Copenhagen. Her research focuses on the dynamics of the uneven geography of cities and regions. Specifically, she studies how the creation of social relations and actors’ involvement in specific local communities affect social relations, knowledge creation, human identity and life chances in time and space.

Eda Beyazit is an Associate Professor at the Urban and Regional Planning Department at Istanbul Technical University (ITU), where she teaches courses on urban transport, urban geography and inequalities, planning philosophy and urban design. She specialises in urban mobilities, especially in the ways in which transport infrastructures generate socio-spatial inequalities at different scales. She examines a range of issues from social justice and transport, to mobility cultures, issues of power, planning and decision-making. Her recent research projects include investigation of the daily travel experiences of female domestic workers in Istanbul and the spatial hierarchical organisation of disaster preparedness in Thrace, Turkey. She was a Visiting Research Associate at Transport Studies Unit, Oxford University (2013–2017). She is one of the collaborators of the UNESCO Chair in Gender, the General Assembly of Partners Habitat III, and a member of COST Network on the Wider Impacts and Scenario Evaluation of Autonomous and Connected Transport.

Jose Bienvenido Manuel Biona is a Full Professor at the Mechanical Engineering Department of De La Salle University (DLSU) in Manila, Philippines. He completed his PhD at DLSU, with visiting PhD research fellowships at University of Portsmouth in the UK, Technical University of Graz in Austria and Universiti Teknologi, Malaysia. His research interests include sustainable transportation policy and planning, alternative vehicles assessment, transportation technology diffusion modelling and energy economics. He has more than 10 years of consulting work experience with the Philippine national and local government agencies as well as with various local and international organisations. He is currently leading a project assessing the desirability of transportation in cities of the Philippines, and the development of the Philippine electric vehicle policy and adoption roadmap.
Geneviève Boisjoly is an Assistant Professor at the Department of Civil, Geological and Mining Engineering at Polytechnique Montréal, Canada. Her research focuses on land use and transport interactions and on their impacts on travel behaviour and health. She is specifically interested in urban accessibility and how land use and transport planning can contribute to more equitable and sustainable cities.

Kristian Bothe is a PhD candidate in economic geography at the University of Copenhagen. His research focuses on urban and regional development and specifically on the wider spatial and socio-economic impacts of urban public transport investments.

Geert te Boveldt is a Research Associate in the research group MOBI at Vrije Universiteit Brussel (VUB), Belgium. His research interests include the social, economic as well as the political dimensions of transport planning. Previously he held positions in several (non) governmental organisations in the fields of sustainable mobility, housing policy and strategic spatial planning, in both Belgium and the Netherlands.

Mengqiu Cao is a Senior Lecturer at the University of Westminster, with a PhD from the Bartlett School of Planning, UCL. He has been a Guest Lecturer and Research Assistant at UCL and at Birkbeck, University of London, and a Visiting Lecturer at University of Westminster. He has worked in academia and industry in transport and urban planning. He was a part-time Research Fellow at the Town and Country Planning Association in 2015; and previously a Logistics Executive working at Inprime Logistics Ltd. His research interests include transport planning, social equity, travel vulnerability, transport and climate change, travel behaviour and well-being, integrated urban planning and sustainable transport development, statistics and transport modelling. He has also worked with public authorities and international funding organisations, such as the British Council, NDRC, MOHURD, Changsha-URPB, Asian Development Bank, and Town and Country Planning Association.

Yannick Cornet is a Senior Researcher in intelligent transport systems at the ERA Chair team at the University of Žilina, University Science Park. He is also a Lecturer in sustainable mobility at the University of Aalborg, Planning Department, Centre for Design, Innovation and Sustainable Transition. He currently researches on smartphone-based, multi-modal diaries for collecting European data on the experience of travel time. His previous research includes sustainable mobility indicators, multi-actor multi-criteria decision-support tools, and case studies on high-speed rail appraisal and cycling transitions. He has also worked as a software project manager on the design of real-time carpooling apps at Nokia. His broader research interests lie in the application of novel information technologies and decision-support tools to the challenge of achieving a transition towards environmental and social sustainability of mobility systems.

Carey Curtis is Professor of city planning and transport at Curtin University, Perth, Australia, Director of the research network Urbanet, and Guest Professor at University of Lund/K2. Her research experience spans four decades and has included over 50 projects in both academia and the planning industry. She has published extensively in the areas of travel behaviour, transport and land use planning, accessibility planning and institutional barriers to sustainable urban development.

Robbin Deboosere graduated with a Master’s degree in Urban Planning from the School of Urban Planning, McGill University. He was previously a Research Assistant for the
Transportation Research at McGill (TRAM) group and received his Master’s degree in Engineering: Traffic, Logistics and ITS, from KU Leuven. His research interests include transport equity, determinants of mode choice, transportation from the user’s perspective, and travel behaviour.

Taotao Deng is an Associate Professor at the Shanghai University of Finance and Economics, China. He received his PhD in Transport Studies from University of Aberdeen, UK. His main research interests are regional economics, transport geography and tourism economics. During the past seven years, he has authored 14 academic journal papers, in Transportation, Transport Reviews, Journal of Urban Planning and Development and Tourism Economics.

Ahmed El-Geneidy is a full Professor at the School of Urban Planning, McGill University, Montreal, Canada. He is currently serving on the board of directors of the Autorité régionale de transport métropolitain (ARTM), the regional public transport planning and financing authority for the Montreal metropolitan region and he is the elected chair of the World Society on Transport and Land Use Research (WSTLUR). He is also an editor of the Journal of Transport and Land Use. His research interests include land use and transport interaction, equity in transport systems, public transport planning and operations, non-motorised (walking and cycling) behaviour and planning and measuring the needs for disadvantaged populations.

Eran Feitelson is a Professor at the Department of Geography and head of the Advanced School for Environmental Studies at the Hebrew University of Jerusalem. He is a previous head of the Federmann School of Public Policy and Government. He has published extensively in the fields of transport policy, land use planning, environmental policies and water policy. In addition to his academic work, Eran has participated in several national planning teams and has been a member of many national committees. He also serves as chair of the Israeli Nature Reserves and National Parks Commission.

Brendan Gleeson is Professor of Urban Policy Studies and Director, Melbourne Sustainable Society Institute, University of Melbourne, Australia. His research interests include urban social policy, city planning and management and environmental theory and policy. He is the author of numerous scientific papers and chapters and his most recent book is The Urban Condition (Routledge, 2014).

Matt Higgins is a transport planning practitioner, with experience working at Steer, Transport for London, the London Borough of Hackney and the Department for Transport. In 2017 he graduated from the MSc Transport and City Planning (Distinction) from UCL, winning the R.B. Hounsfield Prize for his dissertation, which studied opposition to road space reallocation for cycling and the potential for behavioural economics to inform more effective planning and delivery. He has research interests in active travel and behavioural economics.

Haoyu Hu graduated from the School of Geography Science at Nanjing Normal University. He is now a PhD candidate at Peking University, China. His research area is focused on Geographic Information Systems, regional geography and regional transport systems.
**Imre Keseru** is a transport planner and geographer in the MOBI research group at Vrije Universiteit Brussel, Belgium. He has a PhD in Earth Sciences from the University of Szeged in Hungary. He previously worked at the KTI Institute for Transport Sciences in Budapest as a deputy head of unit managing several international projects on urban mobility and cross-border public transport. Currently, he is a postdoctoral researcher and team leader for urban mobility at MOBI.

**Shengxiao Li** is a PhD candidate at the School of Design, University of Pennsylvania, USA. He obtained his bachelor degrees in urban management and economics, and Master’s in urban planning from Peking University in China. His research interests lie within transport equity issues, the interaction between land use and travel behaviour and international transport planning. He has published 10 papers in peer-reviewed journals on transportation and planning, including Transportation Research Part A and D, Transportation and Journal of Transport Geography.

**Lixun Liu** is a PhD graduate at the Bartlett School of Planning, UCL. Her research focuses on urban rail development and social equity issues. She holds an MSc and BSc in Architecture from Tsinghua University, China.

**Neil Stephen Lopez** is an Assistant Professor at the Mechanical Engineering Department of De La Salle University (DLSU) in Manila, Philippines. He completed his PhD from DLSU, including Visiting Research at the Transport Studies Unit, University of Oxford, UK; Bartlett School of Planning, UCL, UK; and the Sustainable Transportation Energy Pathways Institute, University of California, Davis. He is also a member of the Transportation Science Society of the Philippines, and of the Network on European Communications and Transport Activities Research. His research interests include transportation policy and planning, alternative vehicles assessment and energy economics. He is currently working on a project assessing the desirability of transportation in cities of the Philippines, and evaluating policies for future electric vehicles deployment in the Philippines.

**Karen Lucas** is Professor of transport and social analysis at the Institute of Transport Studies, University of Leeds, where she is also the Deputy Director of the Leeds Social Science Institute. She has more than fifteen years of international experience as a social researcher in transport. Her research focuses on developing better understandings of the relationship between transport and social outcomes with a particular emphasis on low-income and socially disadvantaged groups and communities.

**Glenn Lyons** is the Mott MacDonald Professor of Future Mobility at UWE Bristol. He is seconded for half of his time to Mott MacDonald, creating a bridge between academia and practice. Throughout his career he has focused upon the role of new technologies in supporting and influencing travel behaviour both directly and through shaping lifestyles and social practices. A former secondee to the UK Department for Transport and more recently to the New Zealand Ministry of Transport, Glenn has led major studies into traveller information systems, teleworking, virtual mobility, travel time use, user innovation, road pricing, public and business attitudes to transport and future mobility. He is now actively engaged in examining the future prospects for technological innovations including Connected Autonomous Vehicles and Mobility as a Service. He has been involved in a number of strategic futures initiatives and recent engagements have included...
helping transport authorities address future uncertainty in their planning, policymaking and investment; and examining the need for transport planning practice to evolve.

**Cathy Macharis** is Professor at the Vrije Universiteit Brussel, Belgium. Her research group, MOBI, is an interdisciplinary group focusing on sustainable logistics, electric and hybrid vehicles and urban mobility. Her research focuses on how to include stakeholders within decision and evaluation processes in the field of transport and mobility. She has been involved in several regional, national and European research projects dealing with topics such as the implementation of innovative concepts for city distribution, assessment of policy measures in the field of logistics and sustainable mobility, and development of a multi-actor, multi-criteria analysis framework.

**Anthony Perl** is Professor of urban studies and political science at Simon Fraser University in Vancouver, British Columbia, Canada. Before joining SFU, Anthony worked at the University of Calgary, the City University of New York and Université Lumière in Lyon, France. He received his undergraduate honours degree in Government from Harvard University, followed by an MA and a PhD in Political Science from the University of Toronto. His research crosses disciplinary and national boundaries to explore policy decisions made about transportation, cities and the environment. He has published in dozens of scholarly journals and authored five books. His work has been awarded prizes for outstanding papers presented at the World Conference on Transport Research and the Canadian Transportation Research Forum. He has advised governments on transport and urban policy, and is currently a member of the Vancouver City Planning Commission.

**Jan Scheurer** is a Senior Research Fellow at the School of Built Environment, Curtin University and a member of the Future Cities Lab, an Honorary Associate at the Centre for Urban Research (CUR), RMIT University and a frequent visitor at the University of Amsterdam (UvA) and RMIT Europe (Barcelona). Jan’s areas of expertise are urban design, transport and accessibility planning, sustainability policy and mobility culture.

**Rebecca Shliselberg** is a researcher at the Transportation Research Unit, Department of Geography and Human Environment and PhD candidate at the Porter School of Environmental Studies, Tel Aviv University, Israel. She holds an MSc in Urban and Regional Planning from the Technion. After over 25 years of consulting in Israel and abroad, she has recently assumed a position leading a strategic planning unit for transport in Israel under the auspices of the Ministry of Transport. Rebecca’s research interests focus on furthering well-being as a policy objective, particularly focusing on operationalising motility as a means of promoting more socially sustainable transport systems. Rebecca has specialised in public transport planning having developed national planning standards, and has led several strategic sustainable transport planning initiatives in the Tel Aviv region.

**Emilia Smeds** is a PhD candidate at the Department for Science, Technology, Engineering and Public Policy (STEaPP), University College London and a Researcher at the UCL City Leadership Laboratory. Emilia’s research area is urban and transport governance, with a focus on experimentation and innovation for sustainable and socially just mobility. Emilia has been a Research Assistant at Imperial College London for the EU FP7-funded PASTA (Physical Activity Through Sustainable Transport Approaches), and has also
worked as a practising transport planner in Helsinki, Finland. She holds an MSc in Transport and City Planning from the Bartlett School of Planning, UCL and a BSc in Environmental Policy from the London School of Economics and Political Science.

Janet Stanley is Associate Professor and Principal Research Fellow in urban social resilience at the Melbourne Sustainable Society Institute, University of Melbourne, Australia. She specialises in social inclusion, transport, climate change and equity and bushfire arson. She has many refereed journal and book publications; her latest co-authored book is How Great Cities Happen: Integrating People, Land Use and Transport (Edward Elgar, 2017).

John Stanley is Adjunct Professor and Senior Research Fellow in sustainable land transport, Institute of Transport and Logistic Studies, The University of Sydney, Sydney, Australia. John was a former Deputy Chair of Australia’s National Road Transport Commission. He co-authored Introduction to Transport Policy: A Public Policy View, and How Great Cities Happen. His research interests focus mainly on integrated land use transport policy and planning, social inclusion and public transport policy.

Jingwei Sun received his Master’s degree in Geography from University College London and now works as an urban planner at the Jiangsu Institute of Urban Planning and Design, China. His research interests include transport geography, urban planning and economic geography.

Ceyda Sungur is a Visiting Researcher at the Geography Department of the Université Paris 1 – Panthéon-Sorbonne and at the UMR Géographie-Cites. She received her Bachelor’s degree in City and Regional Planning from Middle East Technical University, and her Master’s degree in Urban Design from Istanbul Technical University. Her research focuses on the everyday experiences of women service workers in Istanbul. She specialises in labour geography, mapping and ethnographic inquiry by exploring the everyday experiences of the ‘invisible’ women workers who keep the city ‘sanitary and functional’. Recently she has been involved in a research expedition on the daily travel experiences of women domestic workers.

Imogen Thompson is a City Planner at Transport for London, specialising in the relationship between transport investment and urban growth. Her work examines the impacts of transport on housing delivery, regeneration and growth opportunities. Previously, Imogen has worked as a development planner in Vancouver, Canada, leading on regeneration and transport-oriented development projects. She holds an MSc Transport and City Planning (Distinction) from the Bartlett School of Planning, UCL and a BA (First Class) in Urban Studies from the University of British Columbia, Canada. During her studies, Imogen worked as a researcher at UCL and UBC on a range of international projects including the Sintropher European transnational project and the Vancouver Downtown East Side regeneration study.

Florencenia Rodriguez Touron is an urban mobility specialist from Buenos Aires, Argentina. After graduating in Sociology at University of Buenos Aires, she pursued a Master’s degree in Urban Economics from Torcuato Di Tella University and an MSc Transport and City Planning from the Bartlett School of Planning, UCL. She has worked for the public sector in Argentina at the national level, in public transport performance assessment and then moved to the consultancy field working for national and local governments.
and development banks throughout Latin America. She contributes with NGOs developing mobility planning strategies and policy recommendations in Argentina. Her research topics focus on transport equity and social, economic and urban effects of disruptive technologies in transport.

Qiyan Wu is Professor of the School of Public Policy and Administration, Xi’an Jiaotong University. He was a Professor at the East China Normal University from 2016 to 2017, the Nanjing Normal University from 2010 to 2016 and Academic Dean and Professor at Yunnan University from 2002 to 2010. He was also a Visiting Professor at the University of British Columbia in 2007–2008. His teaching and research over the past five years has focused on the areas of education-led gentrification (e.g. he coined the term jiaoyufication), urban residential segregation, urban housing policy and urban political economy, and has recently included the impact of the high-speed rail system on urban and regional restructuring.

Yongping Zhang is a PhD candidate at the Bartlett Centre for Advanced Spatial Analysis (CASA), University College London. He has an academic background in geography, urban planning and environmental policies. He has research interests in sustainable cities, urban modelling, spatial analysis using urban big data and various issues related to Chinese urbanisation.

Yuerong Zhang is a PhD candidate and Teaching Assistant at the Bartlett School of Planning (BSP) and the Bartlett Centre for Advanced Spatial Analysis (CASA), UCL. Her research interests are public transport network resilience and vulnerability, street networks and urban morphology.
