

Index

Note: many main entries can also be found under chapter headings pertaining to specific modes of transport and particular countries/continents.

- 20 minute city/neighbourhood 19, 31, 63, 158, 160
- 2030 Agenda for Sustainable Development 132
- accidents/injuries 4, 26, 62
 - see also* fatality rates; safety
- Acemoglu, D. 130
- active transport perspectives 60–67
 - appraisal 64–5
 - contemporary issues 65–6
 - data collection/travel surveys 63–4
 - forecasting active travel choices 64
 - health and wellbeing considerations 61–3
 - policy, forecasting and evaluation 63–5
 - travel choices 61
 - see also* cycling; walking
- Africa 146–53
 - bus transport 147–8
 - congestion 147, 148
 - data gathering 149, 153
 - economic factors 146, 150
 - emerging research areas 152–3
 - informal public operations 147–8, 152
 - infrastructure 146, 149
 - institutional structuring 150–52
 - leadership 153
 - monitoring and evaluation systems 149–51, 152–3
 - paratransit 147
 - policy implementation and challenges 148–52, 153
 - political factors 149–50
 - pollution 148
 - public transport 149
 - rail transport 147
 - Regional Economic Community (REC)
 - agreements 149, 153
 - resources 152
 - safety 146, 148
 - set-asides 148
 - silos 151
 - social and cultural factors 146, 150
 - social exclusion/inclusion 148
 - taxis 147–8
- agglomeration effects 10–12, 57
- air quality/air pollution 18, 26, 73, 75–6
 - see also* carbon dioxide emissions; greenhouse gas emissions (GHGs)
- Arthur, B. 30
- Artificial Intelligence (AI) 81
- Asakura, Y. 199
- Asia 138–43
 - accessibility 142
 - accidents 138
 - air quality/air pollution 138, 140
 - aviation sector 139, 140, 141
 - bicycles 141, 143
 - bike-sharing 143
 - bilateral agencies 140
 - bus transport 140–41
 - car use 138, 141, 143
 - climate change 139, 142
 - congestion 138, 140
 - connectivity 140
 - corridor-based projects 138
 - cross-border initiatives 138–9
 - deregulation 139
 - domestic initiatives 138
 - e-bikes 143
 - e-paratransit 143
 - electric and hybrid vehicles 141
 - environmental impacts/issues 140, 141
 - external agencies 140
 - fatality rates 141
 - ferries 141
 - finance/funding 139, 142
 - freight sector 140
 - government 139–40

- greenhouse gas emissions (GHGs) 139, 140
- High Speed Rail (HSR) 140
- highways and road networks 138
- hub-and-spoke network 140
- infrastructure planning and development 138–9
- inland waterways 138–9
- intermediate transport (tractors, carts etc) 142
- intermodal connectivity 139
- liberalization 139
- licence allocation 141
- life-cycle costs 139
- Light Rail Transit (LRT) 140
- maritime sector 138, 140, 141, 142
- megacities 142
- metro systems 140
- mobility needs 142
- Mobility as a Service (MaaS) 143
- modern transportation systems 138
- motorcycles 141, 143
- natural disasters 142
- new services and technologies 143
- noise pollution 140
- parking regulations 141
- port terminal capacity 139–40
- private sector involvement 139–40
- public transport 140
- Public-Private Partnerships (PPPs) 139
- rail transport infrastructure 138, 140, 141
- rapid motorization: policy challenges 140–41
- river transport 142
- road infrastructure 140
- rural road development programmes 142
- safety 140, 141
- sea level rises 142
- shared vehicles 143
- social effects 140
- social exclusion/inclusion 140, 142
- taxis 143
- tramways 140
- Transit Integrated Development (TID) 139
- transit-oriented development (TOD) 139
- trucks 141
- urban transit systems 138
- value chains 140
- walking 141
- Asian Development Bank (ADB) 139
 - Sustainable Urban Transport paradigm – Avoid, Shift, Improve (ASI) framework 29–30
- Astle, R. 35
- Australia 155–62, 165–74
 - ACT Capital Metro Business Case 166–8
 - alliances 165
 - arterial roads 158
 - Brisbane 155
 - Brisbane Airportlink toll road 166
 - Brisbane Cross River Rail Business Case 166, 167
 - cars 157
 - causal influences 157
 - central business district (CBD) 158
 - clusters 158
 - collaborative contracting 169, 173
 - competition diversification 167
 - completion guarantees and standby equity 169
 - congestion/congestion charging 156, 159, 172
 - cycling 158, 160
 - design, build, maintain (DBM) contracts 168, 173
 - Design and Construct (D&C) contracts 165, 168, 173
 - disaggregated contracts 173
 - finance/funding 169–70, 172–3
 - five ‘Ds’ – density, diversity, design, destination
 - accessibility and distance to transit 157
 - freight 156
 - future change/future projects 171–4
 - governance 160–62
 - Government financing 169–70, 172, 173
 - impact elasticities 157
 - infill/urban renewal opportunity areas 158
 - land use transport integration 156–60
 - Melbourne 155, 156, 158, 159, 160
 - Melbourne Metro 169
 - Melbourne Underground Suburban Rail Loop (proposed) 94
 - migration 155
 - mobility 156
 - operating franchises 165
 - operations, trains and systems (OTS) package 168, 171
 - performance-based contracts 168
 - Perth 158, 159, 160
 - Perth and Peel at 5 million* 160
 - polycentric + (transit) corridors + neighbourhoods development model 158
 - population growth 155–6, 162
 - pricing policy 159, 167
 - private sector 169–70, 173
 - Public Private Partnerships (PPPs) 165–6, 168, 169, 171, 172, 173
 - public sector 169–70

- public transport 157, 158, 159, 160, 173
- quality of life 155
- rail transport 159, 165, 166, 173
- registration charge rebate 172
- regulated asset base model 172
- research priority areas 173–4
- resources, access to 167
