Contributors

Arpita Bhattacharjee is currently a Research Fellow in the Economics Division at the Leeds University Business School, working on the EPSRC Self-Repairing Cities Project to investigate how artificial intelligence and robotics stand to alter the socioeconomic and cultural landscapes of cities. She received her PhD in Economics from the University of California, Riverside in 2017. Her current research encompasses applied empirical and theoretical microeconomics, specifically focused on analysis of social inequalities in labour markets, education, and health, and empirical investigation of policies targeted at mitigating inequalities.

Bruno Bonizzi is Lecturer in Political Economy at the University of Winchester, UK. He did his undergraduate studies at Bocconi University in Milan, Italy, before moving to London to do his MSc and PhD at SOAS, University of London. He has taught at City University and the University of East London. His doctoral research focused on pension funds and their investments in emerging market economies. Financialisation, pension funds and developing countries feature prominently in his current research projects. A macro-financial economist by background, he is keen on reaching out to the fields of political economy in addressing these issues.

Pablo G. Bortz holds a BA from the University of Buenos Aires, an MA from the Latin American Faculty of Social Sciences (FLACSO), and a Doctorate degree from the Delft University of Technology. He is currently professor of Advanced Macroeconomics at the MA in Economic Development (IDAES-National University of San Martin), of which he is the co-director. He also teaches at the National University of General Sarmiento (UNGS). He is a grantee of the National Council for Scientific Research (CONICET) in Argentina. He has published in several journals such as Development and Change, the Review of Keynesian Economics and the European Journal of Economics and Economic Policies.

Hasan Cömert is an Assistant Professor of Economics at the Department of Economics at Trinity College, US. He received his PhD from University of Massachusetts at Amherst in 2011. His research interests include central banking, financial markets, financial flows, developing countries and the Turkish economy. He is the author of Central Banks and Financial
Markets: The Declining Power of US Monetary Policy (Edward Elgar, 2013), and co-author (with Rex McKenzie) of The Global South after the Crisis (Edward Elgar, 2016). He has published several articles in Turkish and in English at peer-reviewed journals including Cambridge Journal of Economics. He has contributed as a researcher to different working packages of FESSUD and FEUTURE, European Union-funded projects conducted by the consortiums of many universities.

Óscar Dejuán is a Full Professor of Economics at the University of Castilla-La Mancha, Spain. He obtained his PhD in economics from the New School for Social Research. He is also a Doctor in Law from the University of Barcelona where he got an MA in Economics and Law. In his theoretical research he has combined the Classical-Sraffian theory of value and distribution with the Keynesian theory of output and money. In his applied research he has used Leontief’s input–output analysis. He has authored and edited books with Edward Elgar and Routledge. He has published in a variety of journals including Economic Systems Research, Review of Political Economy, Journal of Post Keynesian Economics, Review of Keynesian Economics, Metroeconomica, Energy Policy, Energy Economics, European Journal for the History of Economic Thought and Cambridge Journal of Economics.

Hélène de Largentaye received her PhD in economics from the University of Cambridge in 1986 after receiving a diploma from the Paris Institut des Etudes Politiques, in 1971, and a Masters in Economics (1972) from University of Paris I. She worked as an economist at the Paris Chamber of Commerce (1974–1997), as Secretary General of the Council of Economic Advisers (1997–2001) founded by Lionel Jospin, Prime Minister of France (1997–2002), and as an economic adviser to Bertrand Delanoë, Mayor of Paris (2001–2014). She co-authored ‘Équilibre et Instabilité’ (1987, Economica), a selection of articles by Nicholas Kaldor, translated into French. She organised the Keynes Conference at King’s College (2016) for the 80th anniversary of the publication of Keynes’s General Theory. She wrote the preface of the 2017 French edition of Keynes’s General Theory published by Payot and translated several essays by Keynes, also published by Payot the same year (La fin du laissez faire).

Cristiano Boaventura Duarte has a PhD in Economics, double diploma: Institute of Economics, Federal University of Rio de Janeiro (IE/UFRJ – Brazil) and Centre d’Économie de l’Université Paris-Nord, Université Paris 13 (CEPN/UP13 – France). He has previously worked at the Brazilian Institute of Geography and Statistics (IBGE) and in the Brazilian main oil and gas Company (Petrobras). He is currently an economist at the Central...
Bank of Brazil where he works in the International Affairs Department, with the team responsible for performing analysis of the global economy. The views presented on the article are his own, and do not represent those of the Central Bank of Brazil.

**Renaud du Tertre** is Associate Professor Emeritus, at Paris Diderot – Paris 7 University, and is a member of the Ladyss Research Laboratory. He worked as a scientific counsellor at the Commissariat Général du Plan (2002–2008) and as Director of Studies at the Institut de Recherches Économiques et Sociales, an institute related to trade unions (2009–2010). His research focuses on uncertainty and price-making of capital, on the impact of finance on the multinational firms’ strategy, and on the growth regime of developed capitalist economies. He is coauthor with Olivier Passet of *Rentabilité et risque dans le nouveau régime de croissance, rapport du Commissariat général du Plan*, 2002; and with Yann Guy ‘Stratégie de valorisation actionnariale et gouvernance des grands groupes cotés’, in Michel Aglietta (ed.), *La transformation du régime de croissance* (2018).

**Gary Dymski** is Professor of Applied Economics at the Leeds University Business School, a position he took up in 2012 after 21 years in the University of California system. His research focuses on discrimination and redlining in credit markets, urban economic development, financial crisis, the subprime and Eurozone crises, banking and financial regulation, and urban development. His research projects at Leeds include one on inequality and finance in Europe, and another on how the robotic transition can be done without worsening inequality. He is involved in two UK-wide network projects, one aimed at rebuilding macroeconomics and the other focused on a region-first approach to the UK productivity puzzle.

**Alicia Girón** is the coordinator of the University Program of Asian and African Studies – National Autonomous University of Mexico (UNAM), and member of the United Nations High Level Panel for Women’s Economic Empowerment. She is a researcher at the Economic Research Institute, and a professor at the Faculty of Economics and tutor of the Economics, the Latin American Studies, and the Administration Sciences Postgraduate degree programs at UNAM. Her main research interests include fiscal and financial economics, as well as gender economics in relation to financial circuits at a macroeconomic and microeconomic level. She was the Director at the Economic Research Institute (1994–2002) and of ‘Problemas del Desarrollo. Revista latinoamericana de Economía’ (2010–2018).

**Diego Guevara** is Assistant Professor in Heterodox Macroeconomics at the National University of Colombia. He did his undergraduate studies in
engineering and then a MSc and PhD in economics. He has taught at the University of La Sabana and Javeriana University, in Bogotá, Colombia. His doctoral research is about financialisation and income distribution, and currently his research interests are on financialisation for emerging economies, and financialisation and history of economic though. He has also been advisor for CUT (Workers Union) in the minimum wage negotiations with the government during 2016 and 2017, and is a regular columnist for one of the main Colombian newspapers, El Espectador.

David Leadbeater is an Associate Professor of Economics at Laurentian University/Université Laurentienne in Sudbury (Canada), located on the traditional Anishinaabe territory of the Atikameksheng Anishnawbek and Wahnapitae First Nation. His work focuses on the fields of regional economic development, labour economics, and urban economics, and on critiques of globalization and impoverishment. He holds degrees from the University of Alberta, Oxford University, and the University of Toronto. He is editor of Resources, Empire and Labour: Crises, Lessons and Alternatives (Fernwood, 2014) and Mining Town Crisis: Globalization, Labour and Resistance in Sudbury (Fernwood, 2008).

Joëlle Leclaire is Associate Professor of Economics and Finance at SUNY College at Buffalo, where she teaches Macroeconomics, Economic Statistics, and Money and Banking. Her research looks at the connection between the real and financial sectors of the economy and the role of private and public debt on financial and economic macro-stability. She has presented her work at numerous conferences and graduate summer schools around the world, has served on international expert bodies such as the INET Private Debt Initiative, and has organized international conferences. Leclaire has published articles in the Journal of Post-Keynesian Economics, the International Journal of Political Economy, and the online Post-Keynesian Forum. She has authored one book, The Great Deficit Debacle (2008) and published one edited volume Heterodox Analysis and Financial Crisis and Reform (2011).

John S. L. McCombie is Professor Emeritus of Regional and Applied Economics and Emeritus Senior Fellow of the Department of Land Economy at the University of Cambridge. He is also Director of the Centre for Economic and Public Policy; Emeritus Fellow in Economics of Downing College and Director of Studies in Land Economy, Christ’s College, Downing College and Girton College. He was formerly a member of the Economics Departments at the University of Hull and at the University of Melbourne. He is a Fellow of the Regional Studies Association and Fellow of the Academy of Social Sciences. He has been
a consultant to the World Bank and the Asian Development Bank and a Special Advisor to a House of Lords Special Committee. His research interests include regional economics and post-Keynesian economics and he is currently researching into income inequality and political philosophy and the methodological and other economic implications of the sub-prime financial crisis.

**Gabriel Michelena** is currently a PhD candidate in Economics at the Universidad de Buenos Aires, where he teaches Quantitative Methods. He is also the author of several articles and publications on trade-related topics presented at congresses and published in different issues of the *Argentine Journal of International Economy (RAEI)* and *Realidad Economica*. He currently works as a Director at the Ministry of Production in Argentina in the impact assessment of public policies. His areas of specialization are applied econometrics, computational models, macroeconomics, and international trade.

**Virginie Monvoisin** is an Associate Professor at the Grenoble École de Management in the department of People, Organizations and Society. She also teaches at the Grenoble Alpes University or Sciences Po Grenoble. She obtained her PhD at the University of Burgundy with top honors. Her PhD dissertation was one of the first French theses on endogenous money. Before moving to Grenoble, she taught at Laurentian University (Canada) as an Assistant Professor. More broadly, her research interests are in the areas of monetary economics, macroeconomics and economic systems. She is currently working on banking systems and their alternative and ethic dimensions. She has published in French and International academics journals and books in her main field of research. Recently, she co-edited *L’économie post-keynésienne: Histoire, théories et politiques* (Editions du Seuil).

**Max Nagel** is a PhD candidate in Political Science and Sociology at Scuola Normale Superiore, Italy. His dissertation looks at institutional change of depoliticized policy fields, analyzing the development of monetary policy frameworks of central banks after the financial crisis 2007 in a comparative case study. He looks particularly at the role of ideas in policymaking by making use of insights from the sociology of knowledge. He has degrees in Economic and Financial Sociology from Goethe University Frankfurt, and International Economics & Development from Bayreuth University.

**Jonathan Perraton** is Senior Lecturer in Economics at the University of Sheffield, UK, and Associate Fellow of the Sheffield Political Economy Research Institute. He obtained an MA in Economics from Cambridge
University and a PhD from Nottingham University. He has published on economic globalization, balance of payments and growth, political economy and economic methodology, including papers in the *Cambridge Journal of Economics*, *International Review of Applied Economics*, *Journal of Economic Methodology*, and *New Political Economy*. His current research interests are in European economic models and development under globalization. He is a past co-ordinator of the UK Post-Keynesian Economics Study Group.

**Nathan Perry** is an Associate Professor of Economics at Colorado Mesa University. His research interests include money and banking issues such as the determinants of inflation and endogenous money. He has also published empirical work in Economic History and has conducted several regional economic grant studies in the state of Colorado, as well as publishing teaching modules on Deficits and Debt with Global Development and the Environment (GDAE). He teaches Money and Banking, Econometrics, Macroeconomics, and upper division statistics courses.

**Louis-Philippe Rochon** is Full Professor of Economics at Laurentian University, Canada. He obtained his doctorate from the New School for Social Research, in 1998, earning him an award for outstanding dissertation. He is the founding editor (now emeritus) of the *Review of Keynesian Economics*, and is currently co-editor of the *Review of Political Economy*. He is the author of over 125 articles in journals and books, and has written or edited 26 books. He has been guest-editor of the *Journal of Post Keynesian Economics*, the *International Journal of Pluralism and Economics Education*, the *European Journal of Economic and Social Systems*, and the *International Journal of Political Economy*. He has published on monetary theory and policy, post-Keynesian economics, and fiscal policy. He is on the editorial board of *Ola Financiera*, *International Journal of Political Economy*, the *European Journal of Economics and Economic Policies: Intervention*, and *Problemas del Desarrollo, Cuestiones Económicas*, and *Credit and Money*. He has been a visiting scholar or professor in Australia, Brazil, France, Italy, Mexico, Poland, South Africa, and the United States, and has additionally lectured in Colombia, Ecuador, Italy, Japan, Kyrgyzstan, and Peru. His forthcoming books include *A Short History of Economic Thought* (Edward Elgar Publishing, 2017, co-edited with Hassan Bougrine), *Employment in the Age of Austerity* (Edward Elgar Publishing, 2017, co-edited with Brian MacLean and Hassan Bougrine), as well as two volumes honouring the work of Marc Lavoie and Mario Seccareccia (co-edited with Hassan Bougrine).
Carlos Schönerwald is a Professor of Economics at the Department of Economics, Universidade Federal do Rio Grande do Sul (UFRGS) – Brazil. His current research interests include macroeconomics, econometrics and history of economic thought. One of his recent papers was co-authored with Matias Vernengo, ‘Microfinance, Financial Inclusion, and the Rhetoric of Reaction: The Evolution and Limitations of Microfinance in Brazil’, and published in Latin American Policy, 7 (2), December, 2016.

Marcia Solorza is Professor of Economics in the Faculty of Economics of the National Autonomous University of Mexico (UNAM), at both the graduate and undergraduate levels. She lectures on the history of economic thought, monetary policy and theory, and on financial crises. She completed her PhD in Economics (UNAM) and focused on the monetary circuit and foreign banking in the late 19th and early 20th centuries. She is currently leading a research project on ‘Monetary Theories and Policies in Developing Countries in the early XXIst Century.’ She has participated as a speaker in numerous seminars and round tables on monetary and financial issues, and has authored and co-authored a number of articles, book chapters, and specialized books on economic history and monetary and financial economics.

Marcello Spanò is Assistant Professor in the Department of Economics, at the University of Insubria, Italy, where he teaches International Economics. He completed a PhD in Economics from the University of York (2004). He has worked on risk management through derivatives for non-financial companies, analysing theoretical and empirical aspects (Journal of Business Finance & Accounting, Rivista Italiana degli Economisti, Journal of Corporate Finance); he has examined emerging markets accumulation of foreign reserves in connection with foreign and domestic finance, foreign exchange risk, real investments and growth (Panoeconomicus). His current research focuses on financialisation and sectoral imbalances, with an empirical focus on European countries (Journal of Post Keynesian Economics).

Hanna K. Szymborska is a lecturer in economics at the Open University, UK. Her research interests include economics of inequality, household finance, financial macroeconomics, and history of economic thought. She has previously worked as a teaching assistant at the University of Leeds, assistant economist at the UK Department of Health, and research assistant at SOAS, University of London, and at London School of Economics and Political Science. She has published in peer-reviewed journals, co-authored articles in policy magazines, contributed to policy reports and chapters in monographs including Michal Kalecki in the 21st Century.

**Matthias Thiemann** is an Assistant Professor of European Public Policy. His more recent work analyses the ideational change after the financial crisis and its impact on financial regulations. He recently published a book on the growth of shadow banking (Cambridge University Press, 2018). His articles on financial regulation have been published in the *American Journal of Sociology*, the *Review of International Political Economy* and the *Cambridge Journal of Economics*, among others.

**Fernando Toledo** is Professor of International Open Economy Macroeconomics in the Faculty of Economic Sciences, National University of La Plata, Argentina. He teaches International Open Economy Macroeconomics in the MA in Economic Development at the High Social Studies Institute, San Martín University, Argentina. He holds a MA in Economics from National University of La Plata, Argentina. His main research interests are in the fields of development macroeconomics, income distribution and international open economy macroeconomics. He has published several articles in books edited by ILO, UNDP and the Ministry of Finance in Argentina.
