

Preface

This book brings together a series of papers examining various aspects of the economic history of sport. These papers follow the publication of an earlier volume *Sports Through the Lens of Economic History* published by Edward Elgar (hardback, 2016; paperback 2017). The papers have greatly benefited from discussions held at the session on “The Economic History of the Sports Sector” at the XVIII World Economic History Congress in Boston in August 2018. Our thanks go to Alex Pettifer and Alan Sturmer at Elgar for their enthusiastic support for the project, and to Martin Shanahan and an anonymous referee for their advice on the draft chapters.
