Acknowledgments

The IUCN World Commission on Environmental Law (WCEL) might be described as the source of this Research Handbook thanks to the work of the WCEL's Specialist Group on Oceans, Coasts and Coral Reefs. The need to address the growing threats and law and policy challenges raised by ocean acidification was originally identified at the WCEL's first World Environmental Law Congress in Rio de Janeiro, Brazil in April 2016. Subsequently, the Specialist Group, then co-chaired by Nilüfer Oral and David VanderZwaag, proceeded to invite and energize its expert members in ocean law and policy from around the world to contribute to this volume which is designed to serve as an ocean acidification law and policy guide. Special thanks go to the WCEL and its chair, Justice Antonio Herman Benjamin, for the leadership and support for advancing the progressive development of environmental law including in the sphere of climate change, ocean acidification, and ocean governance.

The co-editors of this Research Handbook wish to acknowledge various sources of research support. Editorial assistance was provided by Susan Rolston at Seawinds Consulting Services with financial support from the Schulich Academic Executive Fund, Schulich School of Law, Dalhousie University. Professor VanderZwaag received research assistance through the Canada First Research Fund administered by the Ocean Frontier Institute (OFI), through the Marine Environmental Observation, Prediction and Response (MEOPAR) Network which is part of a Canadian Network of Centres of Excellence, and through the Social Sciences and Humanities Research Council of Canada. Professor Stephens acknowledges the research support provided under the Australian Research Council Future Fellowship scheme.

The efforts of Ben Booth and Laura Mann from Edward Elgar are also acknowledged. They helped navigate the book from conception to publication.

The law and policy developments throughout this book are expected to be accurate as of 1 July 2020 unless otherwise noted. Authors were invited, however, to provide further updates to their individual chapters if they wished.
