Contributors

Maria Jesus Alfaro-Simmonds is an architect and researcher on urban childhoods and urban happiness. PhD in Human Geography with a focus on children’s geographies from the University of Birmingham. Her research explores young people’s everyday experiences, needs and use of urban spaces, through the lens of happiness and wellbeing. Her interest is on contrasting models of urban wellbeing, human flourishing and resilience between Western and Latin American Societies. She leads ‘Urban Wellbeing’, an urban social research initiative exploring ways to fuel urban happiness providing a holistic view upon the city.

Sarah Atkinson is Professor of Geography and Medical Humanities at Durham University, UK. She has published several papers advocating greater engagement with social and relational understandings of wellbeing as a critique of mainstream individualist approaches and practices. She contributed to the What Works Wellbeing Evidence Programme on community wellbeing and to the WHO European Region Expert Advisory Group on Cultural Contexts of Health and Wellbeing. She is lead editor on a collection of essays published by Springer, 2019, ‘GeoHumanities and Health’.

Fazeeha Azmi is a Senior Lecturer at the Department of Geography, Faculty of Arts University of Peradeniya, Sri Lanka. Her research interests include post war youth, poverty and livelihood changes, women and migration, internal displacement, fishing communities, post war development and tourism in Sri Lanka. She has published journal articles and book chapters on gender, migration, youth and forced displacement and tourism in Sri Lanka.

Kelly Biedenweg is an Assistant Professor of Human Dimensions at Oregon State University’s Fisheries and Wildlife Department. She studies human wellbeing associated with the natural environment and natural resource management in Latin America and the Pacific Northwest. She received an EPA Early Career Award for her research on Integrating Human Wellbeing and Ecosystem Services. She has a PhD in the human dimensions of natural resource management, with a concentration in Tropical Conservation and Development.

Bettina Bock is Professor for Population Decline and Quality of Life at
Groningen University and Professor for Inclusive Rural Development at Wageningen University. Her areas of research include inclusive rural development and social innovation, migration and spatial justice, governance and rural gender relations. She was the editor in chief of Sociologia Ruralis and board member of the European Society for Rural Sociology until 2019 and is still on the board of the International Rural Sociology Association.

**Mark Cieslik** is a sociologist at Northumbria University, Newcastle Upon Tyne, UK. Since the 1990s he has conducted research into various aspects of learning across the life course that have been widely published. In 2009 he established the British Sociological Association Happiness Study Group, undertaking a number of studies into happiness/wellbeing, details of which have been published in journals, edited collections and monographs.

**Kelly Dombroski** is a community economics scholar researching in the areas of feminist geography, post-development and urban change. She is a Senior Lecturer in Geography at Te Kura Aronukurangi School of Earth and Environment, University of Canterbury, Aotearoa New Zealand.

**Susan J Elliott** is a medical geographer at the University of Waterloo, with a focus on global environment and public health research. Previous roles include Director, Institute of Environment and Health (McMaster); Senior Research Fellow, United Nations University Institute for Water, Environment and Health; Dean, Social Sciences (McMaster); Dean, Health Sciences (Waterloo). She has published widely on wellbeing, is PI for GLOWING (development of a Global Index of Wellbeing), and is Editor in Chief of the new Elsevier journal, Wellbeing Space & Society.

**Heli Gittins** is a Teaching Associate at the School of Natural Sciences, Bangor University where she lectures on environmental and conservation modules. Her research focuses on how nature can impact wellbeing. Her cross-disciplinary PhD research was between the School of Natural Sciences and the School of Psychology at Bangor University, funded by the KESS programme in partnership with The Woodland Trust and Actif Woods Wales. It examined how a nature-based intervention could impact sustainable personal wellbeing and independent woodland use.

**Magdalena Górczyńska-Angiulli**, PhD in geography (from Polish Academy of Sciences and University of Paris I, Panthéon-Sorbonne, 2012), is a researcher at LISER since 2016. Her areas of expertise are: housing policy, affordable housing, gentrification, social mix and inequalities. She has authored articles in leading scientific journals (Urban Studies, Environment and Planning A, Housing Studies), and was a Principal Investigator or collaborator in research
projects funded by the Luxembourg National Research Fund, the National Research Centre in Poland, and ESPON.

Arthur Grimes is Professor of Wellbeing and Public Policy at Victoria University of Wellington’s School of Government and Senior Fellow at Motu Economic and Public Policy Research. He is a former Chairman and Chief Economist of the Reserve Bank of New Zealand. His current research focuses on the economics of wellbeing, and on urban economics.

Martijn Hendriks is an Assistant Professor at the Department of Applied Economics and the Erasmus Happiness Economics Research Organisation (EHERO) of the Erasmus University Rotterdam. He serves as an associate editor for the *Journal of Happiness Studies* and on the boards of the International Society for Quality-of-Life Studies (ISQOLS) and the Happiness Research Organisation (HRO). His specialism is the subjective wellbeing of migrants.

Laura Kapinga is a PhD candidate at the Department of Cultural Geography, Faculty of Spatial Sciences, University of Groningen, the Netherlands. Her research interests revolve around the geographies of religion and spatial dimensions of diversity, inclusion, and wellbeing. In her research project, she zooms in on the postsecular urban context and focuses on the following themes: everyday lives of young people, lived religion, and transitions from youth to adulthood.

Elise Machline, PhD in geography, is a researcher at the Luxembourg Institute of Socio-Economic Research (LISER), Urban Development and Mobility Department. She received her PhD from Paris 1 Panthéon-Sorbonne in cooperation with Ben Gurion University of the Negev (2018), on the socio-economic impacts of ‘green’ buildings. Her research interests lie in sustainable urban planning, affordable housing policies, eco-neighbourhood sustainability assessment, socio-economic impacts of ‘green’ buildings, international comparisons, and eco-gentrification.

Val Morrison is Professor of Health Psychology, studying the cognitive, emotional, social and contextual factors influencing responses to stress, illness, or caregiving in order to inform psychosocial intervention. Examples include interventions to increase social and leisure activities post-stroke, and to improve recovery following hip replacement. With international colleagues, Professor Morrison has received a €4.1m Marie Curie Slodowska International Training Network award to lead 15 projects addressing caregiving motivations and outcomes. She collaborates with Actif Woods Wales/Woodland Trust to study woodland activity and wellbeing.

Jessica Pykett is a social and political geographer at the University of
Birmingham, with research interests on governance, citizenship and knowledge practices. These are explored in the fields of behavioural public policy; urban wellbeing, welfare inequalities, mental health, emotion science, and digital futures. Publications include *Brain Culture* (Policy Press, 2015), and *Neuroliberalism* (Routledge, 2017). Her current research examines the science and ethics of wellbeing promotion in public policy, histories of emotion sensing technologies and the role of happiness economics in shaping urban futures.

**Beverley A. Searle** is a Senior Lecturer in Human Geography at the University of Dundee. She received her PhD in Social Policy from the University of York in 2005. She is co-founder of the Pollinating Wellbeing network established in 2017. Her interest is in transdisciplinary understandings of subjective wellbeing and welfare. This is applied to aspects of social inequalities and intergenerational justice. More recently her work explores how subjective wellbeing impacts attitudes towards environmental change.

**Thomas SJ Smith** is a human geographer interested in community economies and postcapitalist economic spaces. He received his PhD at the University of St Andrews and is currently Assistant Professor at the Department of Environmental Studies at Masaryk University, Czech Republic.

**Fabio Tartarini** is a PhD candidate at the University of Cambridge and a Chartered Psychologist in Italy. He has lectured in Psychology and Criminology, including for the MSc Leadership and Custodial Environments (in collaboration with Unlocked Graduates). He has provided training courses for the Continuing Professional Development division of the British Psychological Society and worked for the Criminal Justice System, both within a private prison and Restorative Solutions CIC. Research interests include: positive psychology, critical social psychology, and community psychology.

**Neil Thin** is a Senior Lecturer in Social and Political Science at the University of Edinburgh. He researches and lectures on happiness, social quality, sustainable development, and appreciative and aspirational social planning. He has authored four books and several institutional policy guides on these themes. He has worked in over 30 countries on wellbeing and social planning, collaborating with NGOs, trade unions, bilateral aid agencies, and the governments of Bhutan, Rwanda, India, and Indonesia, and for the United Nations and World Bank.

**David J Trimbach** is a Postdoctoral Research Associate in the Department of Fisheries and Wildlife at Oregon State University. He is an interdisciplinary social scientist with a PhD in Human Geography. His research primarily focuses on understanding the complex relationships between people and place.
His research interests include: sense of place, human–environment interactions, and human dimensions of natural resource management.

**David Watson** is Lecturer in Organizational behaviour at Norwich Business School and an interdisciplinary researcher interested in the concept of wellbeing and its relationship with work. Research interests include, but are not limited to the theorisation of wellbeing, in particular its relation to Marx’s concept of alienation and his early writings; the capabilities approach; the role of wellbeing in organisations, including ‘alternative’ forms of organisation. He has authored and contributed to a range of journal articles, book chapters and public reports.

**Sophie Wynne-Jones** is a Lecturer in Human Geography at the School of Natural Sciences, Bangor University. Her work focuses on human–nature relations and environmental governance. She has undertaken research funded by UK research councils, DEFRA and Welsh Government, exploring processes of environmental change and stakeholder interactions. This includes recent work on novel governance approaches, evaluating the socio-cultural dynamics and epistemic controversies arising. A critical component of this research is understanding how nature impacts and is valued in relation to human wellbeing.

**Julia Zielke** is a postdoctoral researcher at the University of Bielefeld School of Public Health where she researches gender dimension in health care provision, funded by the German Ministry of Health. Previously she lectured in sociology at a Berlin-based start-up university and earned her PhD on community wellbeing from the University of Liverpool Management School. Julia’s broader research is qualitative and theory-driven and covers multi-scalar epistemologies of health and wellbeing, feminism, housing inequalities and participatory methods.
