Author biographies

Nathalie Drouin

Nathalie Drouin, PhD, MBA, LL.B. is the Executive Director of KHEOPS, an International Research Consortium on the Governance of Large Infrastructure Projects, the Editor-in-Chief of the *International Journal of Managing Projects in Business*, a full professor in the Department of Management, École des Sciences de la gestion, Université du Québec à Montréal (ESG UQAM), Adjunct Professor at University of Technology Sydney (UTS), Australia and Associate Researcher at École nationale d'administration publique (ENAP), Canada. She teaches initiation and strategic management of projects in the Graduate Project Management Programs at ESG UQAM. Her research has been funded by various research councils. The results of her work have been published in major academic journals and presented at several international conferences. She studies organizational project management, leadership issues and megaprojects. She is a member of the PMI Insight Academic Group. She is also a member of the Board of Directors of the Logistics and Transportation Metropolitan Cluster of Montreal (CARGO M) and an Audit Committee Member of Parks Canada Agency Audit Committee, Government of Canada. With Ralf Müller and Shankar Sankaran, she won the 2019 *Walt Lipke Project Governance and Control Excellence Award* for the following paper: Müller, R., Sankaran, S., Drouin, N. (2019), A Model of Organizational Project Management and its Validation Project and Program Symposium, Vol. 2, Edition 1, 17 October pp. 5–20, as well as the 2019 *International Project Management Association IPMA Research Award* for the research work: Müller, R., Drouin, N., Sankaran, S. (2018), Balancing Person-Centric and Team-Centric Leadership in Projects. White Paper, Project Management Institute, May.

Shankar Sankaran

Shankar Sankaran, PhD, MEng, is a Professor of Organizational Project Management at the University of Technology Sydney and conducts research on megaprojects. He has published papers on megaprojects in the *International*

Journal of Project Management and *The International Journal of Managing Projects in Business* and guest edited a special issue on megaprojects for the *Project Management Journal*. Shankar teaches in a Master of Project Management Course at UTS and has successfully supervised 35 doctoral students. He has published more than 150 refereed papers in international journals and conferences. Shankar is the current Vice-Chair of the Project Management Institute's Global Accreditation Centre and won an award for research excellence from the International Project Management Association in 2019 on balanced leadership in projects with Ralf Müller and Nathalie Drouin. Shankar worked in industry where he held leadership positions in a Japanese MNC and set up a global engineering Centre (see <https://www.uts.edu.au/staff/shankar.sankaran>).

Alfons van Marrewijk

Alfons van Marrewijk, PhD, is Full Professor of Construction Cultures (0.2 fte) at the Department of Management in the Built Environment, Faculty of Architecture and the Built Environment of the Delft University of Technology and Adjunct Professor of Project Management (0.2 fte) at the Norwegian Business School BI Oslo. Furthermore, he is Associate Professor (0.5 fte) at the Department Organization Sciences, Vrije Universiteit, Amsterdam. In his academic work he uses anthropological theories and methods for studying inter-organizational collaboration and cultural change in technically oriented organizations and complex megaprojects. Such an approach allows the inclusion of cultural topics, such as the everyday life of employees, temporality, change, rituals, symbols and organizational spaces. Van Marrewijk has published in journals such as *Organization Studies*, *British Journal of Management*, *Long Range Planning*, *International Journal of Project Management*, and *Project Management Journal*.

Ralf Müller

Ralf Müller, DBA, is Professor of Project Management at BI Norwegian Business School, Adjunct Professor at University of Technology Sydney, and at Dalian University of Technology in China. He is Editor-in-Chief of the *Project Management Journal*® and a Fellow of the Project Management Institute (PMI). Ralf lectures and researches worldwide in leadership, governance, and organizational project management. His research work has appeared in more than 250 academic publications and has been acknowledged by PMI, IPMA, Emerald and other organizations with 15 awards in the last 15 years,

including several lifetime achievement awards. Before joining academia, he spent 30 years in industry consulting with large enterprises and governments in more than 50 different countries for better project management and governance. Projects he worked on span from small up to USD 5 billion in value. He has also held related line management positions, such as Worldwide Director of Project Management at NCR Corporation.

CONTRIBUTORS

Maude Brunet

Maude Brunet, PhD, MPM, PMP, is assistant professor at HEC Montréal and associate editor for the *International Journal of Project Management*. Her research interests focus on the governance and innovation of major public infrastructure projects, megaprojects and public–private partnerships. In 2017, Maude won the ‘Young Researcher Award’ presented by the *International Project Management Association*. She has published in the *International Journal of Project Management*, *Project Management Journal*, the *International Journal of Managing Projects in Business*, *Built Environment Project and Asset Management* and the *International Journal of Administrative Sciences*. She has twelve years of experience in project management, including working as a consultant, a research assistant and a lecturer for a master’s program in project management.

Stewart Clegg

Stewart Clegg is a Distinguished Professor at the University of Technology Sydney. He is a leading international researcher recognized in several fields in the social sciences for his work in organization studies and on power. Stewart is a prolific writer and contributor to journals and is the author or editor of a number of books, including recent volumes on *Strategy: Theory & Practice*, *Managing & Organizations*, *Positive Organizational Behaviour*, *Media Management and Digital Transformation*, *Theories of Organizational Resilience and Management*, *Organizations and Contemporary Social Theory*, with various colleagues.

Andrew Davies

Andrew Davies is RM Phillips Freeman Chair and Professor of Innovation Management at Science Policy Research Unit, University of Sussex Business

School. He is Honorary Professor in the Management of Projects in the School of Construction and Project Management, the Bartlett Faculty of the Built Environment, University College London. His research focuses on the management of innovation in large, complex and high-risk projects and project-based firms. He is author of *Projects: A Very Short Introduction* (Oxford University Press, 2017); *The Business of Projects: Managing Innovation in Complex Products and Systems* (Cambridge University Press, 2005), co-authored with Michael Hobday; and *The Business of Systems Integration* (Oxford University Press, 2003, 2005), co-edited with Andrea Prencipe and Michael Hobday. He has published in a range of leading management journals such as *California Management Review*, *MIT Sloan Management Review*, *Research Policy*, *Organization Studies*, *Industrial Marketing Management*, *Industrial and Corporate Change*, *International Journal of Production and Operations Management* and *International Journal of Project Management*.

Daphne Freeder

Dr Daphne Freeder CMC, BA, MBus, examines political leadership and leadership in the megaproject sphere. Daphne has extensive academic teaching experience in the disciplines of e-business marketing, management, employment relations, transnational management, international business practice and information sciences, conducting undergraduate, postgraduate and executive-level training. She has broad professional leadership practice; expertise gained through the public, private and volunteer sectors, working in the fields of radio, public relations, business, knowledge management and higher education.

Ashwin Mahalingam

Dr Ashwin Mahalingam joined the faculty in the Building Technology and Construction Management division of the civil engineering department at IIT-Madras in 2006. Ashwin received his BTech in Civil Engineering from IIT-Madras and then proceeded to Stanford University for a Masters in Construction Engineering and Management. He then helped start up an internet-based company in the USA called All Star Fleet, aimed at providing asset management services for construction companies. Following this he returned to Stanford University to pursue a PhD in the area of Infrastructure Project Management. Ashwin's research interests are in applying theories from the organizational sciences to problems related to project management. His domains of interest include managing and governing large engineering

projects, infrastructure planning and technology adoption on engineering projects. Ashwin is also a co-founder of Okapi Advisory Services Pvt. Ltd and serves as a Director on the Board.

Harvey Maylor

Dr Harvey Maylor is Senior Fellow in Management Practice and an Associate Professor at the Saïd Business School, University of Oxford. He teaches on the Major Projects Leadership Academy and the Saïd Masters in Major Programme Management. He was previously Director of the International Centre for Programme Management at Cranfield, successfully delivering a \$4 million programme of research with HP Enterprise. Prior to that, he founded and ran Cranfield's MSc in Programme and Project Management. His work is widely published in the top management journals and is highly cited. His main text (*Project Management*) is currently Europe's best-selling PM text and has been translated into five different languages. *Researching Business and Management* (with Dr Kate Blackmon and Professor Martina Huemann, Palgrave, 2017) is also proving popular. His main research interests are in lean leadership and complexity in major projects, organizational project capabilities, and the (non-)adoption of promising practices.

Bernard Naughton

Dr Bernard Naughton is a Research Fellow at the Saïd Business School, at the University of Oxford, and his research focuses on leadership, innovation and impact. He is most interested in public sector organizations, and concentrates his research in healthcare, government and executive education settings. His research endeavours to generate clear and practical recommendations for practitioners and policymakers. Bernard is a member of the Royal Pharmaceutical Society of Great Britain and the Academy of Management.

Yvonne Schoper

Dr Yvonne Schoper is Professor for International Project Management at HTW University of Applied Sciences in Berlin. Dr Schoper holds a BSc in Engineering Management, an MSc International Business and a PhD in Industrial Engineering from Cranfield University. She worked for 12 years as project manager for BMW where she was responsible for several international car development projects in Germany and in the USA. She is associate Professor at Tongji University in Shanghai, at Reykjavik University in Iceland

and at Monterrey TEC in Mexico. Her research interests are the projectification of economies and its impact on societies, intercultural project management, and women in project management. She is a member of the Presidential Advisory Board of GPM German Association for Project Management. From 2015 to 2018 she served as the IPMA Research Conference Coordinator.

Natalya Sergeeva

Natalya Sergeeva is Associate Professor in the Management of Projects at the Bartlett School of Construction and Project Management, University College London. Natalya holds a PhD degree in the subject of innovation narratives in the built environment context. She has practical experience in managing a large water-supply company through a number of projects of different scales. Natalya is actively engaging with professionals in the infrastructure industry: permanent owners, suppliers, temporary organizations and professional institutions. Natalya's research interests include applications of organizational theories including sense-making, social identity, and narration in understanding innovation at firm and project levels. Her work has been published in *International Journal of Project Management*, *Project Management Journal*, *International Journal of Managing Projects in Business*, *Engineering Project Organization Journal*, *Construction Economics and Management*, *Industrial Marketing Management*, *International Journal of Innovation Management*, *European Journal of Innovation Management*, and *Creativity and Innovation Management*.

Qian Shi

Prof. Dr. Qian Shi graduated from Tongji University, Shanghai. Currently, he works as a full professor in the Department of Construction Management & Real Estate, School of Economics and Management, Tongji University. He is also the Senior Deputy Dean of the School of Economics and Management, Tongji University and the chairman of the project management division of the Shanghai Society of Civil Engineers. His research mainly focuses on Project Management, Sustainable Construction, Green Building, Facility Management, and so on. He has a book published in the United States by Project Management Institute and many scientific papers in, for example, the *International Journal of Project Management*, *Habitat International*, *ASCE-Journal of Management in Engineering*, and *Construction Management and Economics*. Professor Qian Shi has been involved in many mega construction projects in mainland China, such as the Beijing New International Airport

(Daxing Airport), Shanghai Hongqiao Transportation Hub, Shanghai Pudong International Airport, and Shanghai World Expo 2010.

John Steen

John Steen is the EY Distinguished Scholar in Global Mining Futures at the University of British Columbia and strategy director for the Bradshaw Research Initiative in Minerals and Mining (BRIMM). John is currently leading major international research studies on the subject of innovation and sustainable development in the resources sector and in developing economies. This includes the transition to new digital business models, technology ecosystems and performance in megacapital (\$1billion +) projects. John is highly sought-after as a guest speaker and commentator, and has given talks on strategy and innovation to businesses and governments in Australia, the Americas, Asia and Europe. John is currently senior editor for the *Project Management Journal* (the research journal of the Project Management Institute).

Linzhao Wang

Linzhao Wang, PhD, is a Postdoctoral Researcher at the School of Economics and Management, Dalian University of Technology, Dalian, China. He has published more than ten research articles and book chapters within the field of temporary organizing. His research focuses on organizational resilience, project governance, and leadership. He can be reached at arroyo@hotmail.com.

Chao Xiao

Dr Chao Xiao is currently a Research Fellow in the Department of Construction Management & Real Estate, School of Economics and Management, Tongji University. Before this, she had years of experience in the United States as an Assistant Professor in East Carolina University and a Lecturer in University of Massachusetts, Amherst. She got her PhD degree in Architecture from Texas A&M University in 2015, and both her Master and Bachelor degrees from Tongji University. Her research statement is to improve the sustainability, organizational performance and decision-making of megaprojects using methods like artificial intelligence, data science and network science. She conducts research actively in the fields of complex project management, smart construction and operation management, sustainable construction, and so on. Dr Chao Xiao has published more than ten academic papers in top journals like

International Journal of Project Management, and chaired or participated in nearly ten national and regional funded research projects.

Fangwei Zhu

Fangwei Zhu, PhD, is a Professor and Dean of School of Economics and Management, Dalian University of Technology, Dalian, China. He is the Director of the Institute of Enterprises Management in DUT. He is also the Director of National Center for Industrial Science and Technology Management Development (at Dalian) and the Executive Director of China Management Case Sharing Center. He conducts research in organizational project management, network governance and EPC project management. The results of his studies have appeared in more than 60 publications, including six books, and six top-100 Chinese Management Cases in six consecutive years. He can be reached at zhufw@dlut.edu.cn.
