Contents

List of contributors vii

1 Towards a new age of research methods in public administration, public management and public policy 1
   Eran Vigoda-Gadot and Dana R. Vashdi

PART I QUANTITATIVE AND MIXED METHODS

2 Analysing relationships between multiple variables: applications for public administration, policy and management 13
   Dana R. Vashdi and Eran Vigoda-Gadot

3 Mixed methods in public administration: advantages and challenges 28
   Paolo Belardinelli and Valentina Mele

4 Agent-based modeling as a tool for public management research 42
   Fabian Homberg, Davide Secchi and Dinuka B. Herath

5 Hybridizing agent-based with system dynamics models: principles for theory development in public policy and management research 63
   Lisa Christen Gajary

6 Measurement of public values that do not involve money 88
   Jonathan Baron

7 Theory building in public administration: utilizing factor analysis in the development of analytical constructs 107
   Kalu N. Kalu

8 The use of difference-in-differences (DiD) in public administration research 127
   Yaniv Reingewertz

PART II QUALITATIVE AND COMPARATIVE METHODS

9 Qualitative research approaches: application in a UK public administration context 139
   Ruth Plume, Alan Page and Hemda Garelick

10 Comparative methods A: exploring big comparative questions in public administration 161
    Evan Berman and Don-Yun Chen

11 Comparative methods B: comparative methods in public administration – the value of looking around 181
    Sabine Kuhlmann and Markus Seyfried
12 Comparative methods C: building a cross-national research project
Mary E. Guy and Seung-Bum Yang

PART III EXPERIMENTAL METHODS

13 Experimental methods A: survey experiments in public administration
B. Guy Peters and João V. Guedes-Neto

14 Experimental methods B: laboratory experiments
Robin Bouwman

PART IV PROGRAM EVALUATION, POLICY AND NETWORK ANALYSIS

15 Program evaluation A: program evaluation in action – traditional and innovative approaches
Huey T. Chen

16 Program evaluation B: evaluation, big data, and artificial intelligence: two sides of one coin
Frans L. Leeuw

17 Policy analysis: evaluating big stories
Shlomo Mizrahi

18 Introduction to social network analysis methods
Pamela A. Mischen

PART V BIG DATA AND ADVANCED METHODS

19 Advanced methods and big data
Donald F. Kettl

20 Dealing with open data: measuring the performance of public higher education institutions using open government data
Vanessa Hernandes Oliveira de Oliveira and Róberson Macedo de Oliveira

PART VI ETHICS, OUTLIERS AND REPORTING

21 Ethical considerations in public administration research
Richard. W. Schwester

22 Finding gold in the dross: outliers as a resource for policy analysis
Anat Gofen and David L. Weimer

23 Constructive ending: how to finalize the conclusion and discussion of a research project and a journal article
Alexey G. Barabashev
