Margarita Angelidou (BSc, MSc, MBA, PhD) is a manager of international research projects related with urban and regional innovation and an expert of the European Commission on digital transition. During recent years, she has worked as a smart city advisor and educator in the private, academic and public sector. By education she is an urban planner backed by an Executive Master of Business Administration (MBA) and a PhD in Smart City Planning and Development. She graduated summa cum laude from all her degrees and has obtained eleven distinctions and awards for her work. Her research interests include urban planning and regional strategies, urban and regional innovation and business model innovation for cities as platforms.

Ari-Veikko Anttiroiko, PhD, is a faculty member and an Adjunct Professor at Tampere University, Finland. His main research interests lie in the areas of local governance, local economic development, public sector innovations, smart cities and city branding. Anttiroiko has collaborated with academics and government agencies in different parts of the world. He has memberships in several editorial boards of international journals. His major edited work is *Electronic Government* published in six volumes in 2008. His latest authored books include *The Political Economy of City Branding* (2014), *New Urban Management* (2015) and *Wellness City* (2018).

Dimitrios Bechtsis is an Assistant Professor at the Department of Production Engineering and Management of the IHU and a senior researcher at the Laboratory of Statistics and Qualitative Analysis Methods at AUTH. His scientific interests include IT, DBMS, IoT, Industry 4.0, autonomous vehicles, digital/sustainable supply chains and agrifood systems. He is focusing on the incorporation of intelligent autonomous vehicles and systems in the supply chain ecosystem. He has participated in more than 20 national and European research projects and is a member of the Technical Chamber of Greece, the Association of Mechanical-Electrical Engineers of Northern Greece and the Greek Association of Supply Chain Management.

Fábio Duarte is a Research Scientist at the Senseable City Lab, Massachusetts Institute of Technology. Duarte is also professor of urban management at the Pontificia Universidade Católica do Paraná, Brazil, and has been visiting

professor at University of Twente, Yokohama National University, and the Universidad Politécnica de Cataluña. Author of several peer-reviewed papers published in journals such as *Urban Studies*, *IEEE Internet of Things*, and *Transport Policy*, Duarte led the consulting team of the mobility plan of Curitiba and was a consultant in urban mobility for the World Bank.

Christina Kakderi, PhD, is an Assistant Professor of Spatial Development and RTDI Policies in the EU at Aristotle University of Thessaloniki (AUTH), School of Spatial Planning and Development. She is a regional economist and a researcher at URENIO (www.urenio.org) focusing on systems of innovation and smart innovation environments. Christina is also a fellow of the State Scholarship Foundation (IKY). She holds a degree in Economics from the University of Macedonia in Thessaloniki, an MSc from the School of City and Regional Planning, Cardiff University, UK and a PhD on innovation systems analysis from the Faculty of Engineering of Aristotle University of Thessaloniki.

Nicos Komninos holds a Master's degree in Architecture-Engineering, postgraduate studies in Semantics, and a PhD from the EHESS Paris. He is Professor Emeritus at the School of Engineering of Aristotle University of Thessaloniki and CEO of Intelspace Technologies. He has coordinated numerous research projects of H2020 and interregional cooperation programmes, and participated in the design of science and technology parks, smart cities, and regional innovation strategies in most regions of Europe. He is a member of the group of experts for the OECD innovation strategy, and assessor of research in the EU, Scandinavian countries, Asia and New Zealand. He is author of 170 publications, including twelve books, on intelligent and smart cities, urban planning, innovation territories and strategies. He is editor, associate editor and member of the editorial board in twelve academic journals and co-editor of Elsevier's series on smart cities.

Ioannis Kompatsiaris is a Researcher Director at CERTH-ITI, the Head of Multimedia Knowledge and Social Media Analytics Laboratory and Deputy Director of the Institute. His research interests include image and video analysis, big data and social media analytics, semantics, human computer interfaces (AR and BCI), eHealth, security and culture applications. He is the co-author of 129 papers in refereed journals, 46 book chapters, 8 patents and more than 420 papers in international conferences. He is an elected member of the IEEE IVMS – TC, a Senior Member of IEEE and member of ACM.

Karima Kourtit is since 2017 leader of the Department of Smart Cities at the Jheronimus Academy of Data Science (JADS), 's-Hertogenbosch. She has worked at the Center for the Future of Places (CFP) of the

Department of Urban Planning and Environment, School of Architecture and Built Environment at KTH Royal Institute of Technology, Stockholm, and Adam Mickiewicz University, Poznan, Poland. She holds two PhDs, in economics and geography (with distinction), and has a profound interest in regional and urban topics. Her research interest focuses on the emerging 'New Urban World'. Her main scientific research is in the field of creative industries, urban development, cultural heritage, digital technology, and strategic performance management. Lately, she has also been involved in the implementation of several national and international research projects and initiatives. Furthermore, she has been an editor of several books and guest editor for many international journals, and has published a wide array of scientific articles, papers, special issues of journals and edited volumes in the field of geography and the spatial sciences. She is also managing director of The Regional Science Academy.

Valeria Loscri is a permanent researcher of the FUN Team at Inria Lille–Nord Europe since 2013. From December 2006 to September 2013, she was research Fellow in the TITAN Lab of the University of Calabria, Italy. She received her MSc and PhD degrees in Computer Science in 2003 and 2007, respectively, from the University of Calabria. Her research interests focus on heterogeneous communication technologies, their coexistence and complementarity, molecular communication and Visible Light Communication. She has been involved in several European and national projects such as the FP7 project VITAL, the FP6 project MASCOT, the national project (PRIN) StemNET and the national project (PON) Kom4t-me. Since 2016, she has been appointed scientific delegate of European partnerships for Inria Lille – Nord Europe.

Nathalie Mitton received MSc and PhD degrees in Computer Science from INSA Lyon in 2003 and 2006 respectively. She received her Habilitation à Diriger des Recherches (HDR) in 2011 from Université Lille 1. Since 2006 she is an Inria full researcher and since 2012 she is the scientific head of the Inria FUN team, focused on small computing devices like electronic tags and sensor networks. Her research interests are on self-organisation from PHY to routing for wireless constrained networks. She has published her research in more than 30 international revues and more than 100 international conferences. She is involved in the setup of the FIT IoT LAB platform (<http://fit-equipex.fr/>, <https://www.iiot-lab.info>), the FP7 VITAL or H2020 VESSEDIA projects and in several program committees such as Infocom 2020&2019, PerCom2019, Adhocnow 2018&2016&2015, ICC 2018, Globecom 2019&2018&2017, Pe-Wasun 2017, VTC 2019&2018&2017&2016, etc. She supervises several PhD students and engineers.

Luca Mora (BSc, MSc, Double PhD, FHEA, FRSA) is Lecturer in Urban Innovation Dynamics at Edinburgh Napier University's Business School and Research Affiliate at the Centre for Smart Cities of Edinburgh Napier University's School of Engineering and the Built Environment. His research is interdisciplinary and investigates the interplay between information technology, sustainable urban development and urban innovation. Luca is a Fellow of the Royal Society of Arts (FRSA) and a Fellow of the Higher Education Academy (FHEA), and he has been appointed to the Editorial Boards of *Journal of Urban Technology* and *Sustainability*. Luca is also working as Guest Editor of Special Issues on smart city development for *Organization Studies*, the *Journal of Urban Technology* and *IEEE Transactions on Engineering Management*.

Vaia Moustaka is a PhD candidate and works as a research associate at the Department of Informatics, Aristotle University. She holds a MEng in Electrical & Computer Engineering from Aristotle University (Greece), and an MA in Public Relations and Marketing with New Technologies from TEI of Western Macedonia (Greece). Her research interests include smart cities data analytics, big data mining and analytics, research approaches on data metrics and mining and social network analysis. She has participated in four research projects (EU FP7, H2020, and national funds).

Peter Nijkamp is Emeritus Professor in Regional and Urban Economics and in Economic Geography at the VU University and associated with the Jheronimus Academy of Data Science (JADS) of the division Smart Cities, 's-Hertogenbosch (The Netherlands), Royal Institute of Technology (KTH), Stockholm (Sweden) and A. Mickiewicz University, Poznan (Poland). He is member of editorial/advisory boards of more than 30 journals. According to the RePec list he belongs to the top-30 of well-known economists world-wide. He is also a fellow of the Royal Netherlands Academy of Sciences, and past vice-president of this organization. He has served as president of the governing board of the Netherlands Research Council (NWO). In 1996, he was awarded the most prestigious scientific prize in the Netherlands, the Spinoza award.

Jeroen Oskam is the Director of the Research Centre at Hotelschool The Hague. The two research areas of this Centre are hospitable behaviour and its business consequences, and future developments in the hospitality industry. Jeroen's own research pertains to the latter area, with recent scenario studies on topics as Airbnb and OTAs. His latest book is titled *The Future of Airbnb and the 'Sharing Economy': The Collaborative Consumption of Our Cities* (2019). Jeroen obtained his PhD in 1992 from the Universiteit van Amsterdam and has worked at different hotel and

tourism schools in the Netherlands and in Spain. He was one of the founders of the *Journal of Tourism Futures*.

Akm Özdemir is a visiting researcher at JADS from the Department of Labour Economics and Industrial Relations at the Sakarya University in Turkey. He is a PhD candidate and a full-time faculty member in the social policy field. His doctoral research investigates social welfare in smart cities. He takes a multi-disciplinary approach that encompasses the fields of social policy and smart city theories. His primary specialization is social policy. Broadly, his research concerns poverty, labour economics, ethnicity and urbanisation.

Anastasia Panori is a postdoc researcher at URENIO Research. Her main research interests focus on urban and socio-economic development, data science, smart cities, and smart specialisation strategies at a regional level. Since 2012, she has been working as a researcher and has participated in various projects funded by the European Union and the Greek Government. She is Electrical and Computer Engineer (Aristotle University of Thessaloniki, Faculty of Engineering), and holds an MSc in Economics (University of Macedonia in Thessaloniki, Dept. of Economics), and a PhD in Economic and Regional Development (Panteion University of Athens).

Riccardo Petrolo is currently R&D Engineer at Konica Minolta Laboratory Europe Rome, Italy. He received BSc and MSc degrees from University 'Mediterranea' of Reggio Calabria, Italy in 2010 and 2013 respectively. In 2016, he received his PhD degree from Lille 1 University, France. During this period, Dr Petrolo served as Research Assistant at Inria Lille – Nord Europe, and he was involved in the development of the EU FP7 VITAL project, one of the first Operating Systems for Smart Cities. In 2015, Dr Petrolo was Visiting Researcher in the GTA group at UFRJ, Rio de Janeiro, Brazil. From January 2017 to January 2019 he was Postdoc Fellow at Rice University (Houston, Texas, USA) where he led the ASTRO project. His current research interests include Internet of Things, robotic networks, semantic interoperability, edge computing, and smart cities.

Carlo Ratti is an architect and engineer by training. Carlo Ratti practises in Italy and teaches at the Massachusetts Institute of Technology, where he directs the Senseable City Lab. Carlo holds several patents and has co-authored over 250 publications. As well as being a regular contributor to *Project Syndicate*, he has written for *Le Monde*, *El Pais*, *La Stampa*, *Corriere della Sera*, *Scientific American* and *The New York Times*. His work has been exhibited worldwide at venues such as the Venice Biennale,

the Design Museum Barcelona, the Science Museum in London, MAXXI in Rome, and MoMA The Museum of Modern Art in New York City.

Alasdair Reid is a Research Fellow at Edinburgh Napier University's Centre for Smart Cities. He is also a Lecturer in Property Evaluation within the School of Engineering and the Built Environment at Edinburgh Napier University, where he obtained a first-class honours BSc Degree in Estate Management (RICS accredited), before completing an MSc Degree in City Planning and Regeneration at University of Glasgow.

Hans Schaffers received his PhD in engineering at University of Twente, The Netherlands with a dissertation about computer-assisted multi-objective planning of water resources systems. He worked as assistant professor in Finance at Erasmus University Rotterdam, corporate management at PTT Post, senior researcher in technology studies at TNO Policy Studies, group scientific leader in collaborative systems at Telematica Instituut, visiting professor and research director at the Centre for Knowledge and Innovation Research at Aalto University School of Business, and research professor in digital business innovation at Saxion University of Applied Sciences. He has initiated and coordinated a variety of projects in European Framework programmes such as on smart systems, collaborative working, user-driven open innovation, smart cities and regions, future Internet innovation ecosystems, and transition of industrial innovation.

Ioannis Tsampoulatidis is a research associate at CERTH-ITI and managing director at INFALIA PC, a spin-off company of CERTH. He is a PhD candidate at AUTH, focusing on open cities in the context of ICT towards smart urban development. He has actively participated in 25 European and national research projects on a wide range of research areas such as e-government, smart cities, big data analysis and visualisation, blockchain technology, open web and accessibility standards and medical imaging. His scientific work has been published in 6 refereed journals, 4 book chapters and 22 international conferences and he has almost 20 years of experience in the ICT field.

Athena Vakali is a Professor and Vice Head at the Informatics School of the Aristotle University, Greece, where she leads the Data and Web Research Laboratory. She holds a PhD degree in Informatics (Aristotle University), an MSc degree in Computer Science (Purdue University, USA) and a BSc in Mathematics (Aristotle University). Her current research interests include big data mining and analytics, AI algorithms for the Next Generation Internet applications, smart cities data analytics, online social networks mining, as well as on online sources data management on the cloud. Her publication record of over 120 papers received

over 6,340 citations (h-index 31 in Google Scholar). She has served as a member in the EU Steering Committee for the Future Internet Assembly (2012–14) and she has participated in more than 30 research projects (EU FP7, H2020, and national funds). She has co-chaired major conferences committees such as IEEE/ACM/WIC Web Intelligence 2019, EAI 2016 Conference on Future Internet Infrastructures and Enablers and EU Internet Science Conference 2015.

Snoweria Zhang is a designer, artist and mathematician. Currently, her work focuses on the interstitial space between the built environment and the digital fabric of cities. Most recently, she can be found at the MIT Senseable City Lab where her design work was featured on the cover of *Nature*. Previously, she studied architecture and mathematics at Harvard University.
