About the contributors

**Joel Bothello** (Ph.D., ESSEC Business School) is Associate Professor in Strategy and Sustainability at the John Molson School of Business, Concordia University and holds the position as the Concordia University Research Chair in Resilience and Institutions. His research interests revolve around how organizations and individuals respond to institutional and market demands. His main project focuses on the townships of Cape Town, South Africa, where he studies informal economy entrepreneurship. He is a co-founder of OS4Future.

**Kevin D. Carlson** (Ph.D, University of Iowa) is Professor of Management and Associate Dean for Research and Faculty Affairs in the Pamplin College of Business at Virginia Tech. His current interests are workforce effectiveness and the role of problem solving, data analytics, and improvement management in driving systematic improvement in ecosystems and the human condition.

**Gary Chapman** (Ph.D., Queen’s University Belfast) is Senior Lecturer in Business and Management at Leicester Castle Business School, De Montfort University, UK. Gary’s research focuses on firm innovation and strategy. He has published in leading journals such as *Research Policy* and *Technovation*.

**Gary Cocke** (M.S., Texas Christian University) serves as Director of Sustainability and Energy Conservation, leading the Office of Sustainability at UT Dallas. He holds bachelor’s and master’s degrees in Biology with a concentration on ecology and conservation, and brings experience in municipal and non-profit leadership to his work in higher education sustainability. The belief that everyone has a role to play in sustainability guides his work to integrate sustainability across the campus through student engagement, academics, operations, and administration.

**Giuseppe Delmestri** (Ph.D., Mannheim University) is Professor of Organization and Management Theory and Head of the Institute of Change Management and Management Development at WU Vienna University of Economics and Business, Austria, where he is also member of the STaR Center for Sustainability, Transformation and Responsibility. He is a co-founder of OS4Future, board member at EGOS and ASSIOA (the Italian association for Organization Studies) and responsible for management topics in the Arbeitsgruppe ProDok Faculty of VHB.
Rick Dickinson (M.B.A., Presidion Graduate School) is a strategic thinker with a long career in sustainable product development, marketing, and communications. Currently, he is a business advisor at the Center for Inclusive Entrepreneurship, helping build business communities with a focus on disadvantaged and low-income populations. He supports pre-venture and early venture businesspeople in the North Olympic Peninsula of Washington State.

Melissa Edwards (Ph.D., University of Technology, Sydney) is Director of the Executive MBA program at the University of Technology Sydney, Business School. She teaches sustainability in the business undergraduate and postgraduate programs and has held various National and University grants for embedding sustainability in curricula. She has widely published on corporate sustainability, social impact, and sustainability in management education.

Helen Etchanchu (Ph.D., ESSEC Business School) is Associate Professor at Montpellier Business School, where she holds the Chair on Communication and Organizing for Sustainability Transformation and leads the pedagogy and research group of the sustainability lab. Her research explores how we may organize for and make sense of grand challenges such as climate change, inequality, or health. She is a co-founder of OS4Future.

Regina Frank (Ph.D., Universität Bremen) is Senior Lecturer in Entrepreneurship and Innovation at Leicester Castle Business School, De Montfort University, UK. Regina’s research interests include social innovation and entrepreneurship for poverty alleviation, for and with marginalized communities and in emerging markets, as well as education for sustainable development.

Billy Friebele (M.F.A., Maryland Institute College of Art) is a multimedia artist and Associate Professor of Art at Loyola University Maryland. Working with hybrid combinations of physical forms and digital processes, he explores the balance between technology, humans, and nature. Friebele has exhibited at the Baltimore Museum of Art, the Orlando Museum of Art, the Art Museum of the Americas, and the Kreeger Museum of Art among other venues nationally and internationally.

Joanna Gentsch (Ph.D., University of Texas at Dallas) is the Director of Community Engaged Learning for the Office of Undergraduate Education and a faculty member in the School of Behavioral and Brain Sciences at the University of Texas at Dallas. As a developmental psychologist, she has witnessed first hand the reciprocal benefits of community-engaged learning for students, faculty, staff, and community partners. She enjoys teaching undergraduates and focuses her efforts on developing innovative co-curricular programming.
John H. Grant (D.B.A., Harvard Business School) is a Sustainability Advisor, based in Colorado, with particular interests in organizational performance measures, including interactions with the biosphere and political systems. He has served as Visiting Fellow in the School of Global Environmental Sustainability at Colorado State University (2015–17) and previously as the R. Kirby Professor of Strategic Management at the University of Pittsburgh.

Stefanie Habersang (Ph.D., Leuphana University Lüneburg) is a post-doctoral researcher at the Institute of Management and Organization at the Leuphana University of Lüneburg, Germany. Her research interests revolve around female entrepreneurship and gender stereotypes, sustainable digital transformation and novel qualitative approaches in organization and management research. She is a co-founder of OS4Future.

William E. Hefley (Ph.D., Carnegie Mellon University) is Clinical Professor at the University of Texas at Dallas, USA. His research interests include corporate social responsibility, and he was a member of the US Technical Advisory Group throughout the development of ISO 26000. He is a graduate of Carnegie Mellon (Ph.D., Organization Science & Information Technology and M.S., Engineering & Public Policy), University of Southern California (MSSM), San José State University (B.A.), and Excelsior College (B.S.). He holds multiple professional certifications, including Certified Management and Business Educator (C.M.B.E.).

Mark Heuer (Ph.D., George Washington University) is Associate Professor of Management and Marketing at Susquehanna University. He earned an M.B.A. from the University of Maryland and attended the Lutheran School of Theology at Chicago and Yale Divinity School. Dr. Heuer has over 30 years of professional experience in the corporate, government, and non-profit sectors.

Gabriela Gutierrez Huerter O (Ph.D., University of Nottingham) is Assistant Professor in International Management at King’s Business School, King’s College London. Her work is positioned at the intersection of international business, corporate social responsibility, and comparative institutional analysis. She is a member of OS4Future.

George Ionescu (Ph.D., Academia de Studii Economice din Bucuresti) is a former stockbroker at the Bucharest Stock Exchange and Professor of Finance at the Romanian–American University in Bucharest, Romania. George has extensive business experience related to international financial markets, investment management, venture capital, and sustainable development. He was co-opted into the Drafting Committee for National Sustainable Development Strategy Romania 2013–2020–2030 and is the author of more
than fifty articles published in scientific journals or in proceedings of international conferences.

Jimmy Y. Jia (M.B.A., University of Oxford) has a multidisciplinary background, as an entrepreneur, professor, author, and speaker. He is Visiting Scholar at George Washington University and an adjunct faculty member at Presidio Graduate School and Saybrook University, where he teaches strategy, climate change, and sustainable energy systems courses. He is on numerous boards, including of the Center for Sustainable Energy and of the CleanTech Alliance. He holds five patents, has authored numerous publications, is a frequent speaker on topics of energy futurism and leadership, and is a D.Phil. Candidate at University of Oxford studying climate finance.

Te Klangboonkrong (Ph.D., Cranfield University) is Senior Lecturer in Business and Management at Leicester Castle Business School, De Montfort University, UK. Te’s current research involves entrepreneurship by disadantaged social groups. Te holds an M.B.A. from the Asian Institute of Technology and served as a Client Consulting Analyst at Nielsen in Thailand.

Ralph Meima (Ph.D., Lund University) directs solar project development for Green Lantern Group and his career spans the fields of software development, IT marketing, and consulting. Ralph was the founding director of the Marlboro M.B.A. in Managing for Sustainability, serves on his town’s energy committee, advocating for renewable energy and climate action, and has an M.B.A. in Engineering degree. Ralph has lived in six countries and speaks several languages. Since 2003 he has lived in Brattleboro, Vermont with his family and has published a speculative fiction trilogy and several works of non-fiction.

Van V. Miller (Ph.D., University of New Mexico) is Professor Emeritus of Central Michigan University and served as a Fulbright Research Scholar to Central America in 1988. He received two U.S. Department of Education grants to develop sustainability programs at Central Michigan University during the period 2008–2013 and recently finished a NASA grant examining the influence of human decisions upon wildland fire outcomes.

Shelley F. Mitchell (Ph.D., University of New Hampshire) is Professor of Management & Sustainability and Research Fellow at HULT International Business School, USA. At the University of New Hampshire, she taught for eight years at the Paul College of Business and Economics. Her teaching and research span socially responsible business, strategic management, social and environmental entrepreneurship, SMEs and ecological sustainability, sustainability mindset, and sustainability in management education, for which she has received numerous academic awards.

Dave Nelson (Ph.D., University of Toledo) has worked in the fields of
Environmental Science and Health & Safety for 25 years across the U.S., having developed and managed multiple testing laboratories. He has graduate degrees in Science and Business and a Ph.D. in Operations Management, with research areas of Alternative Energy, Supply Chain Sustainability, Corporate Social Responsibility, Circular Economy, Climate Change Adaptation and impact of Coronavirus.

Louise Obara (Ph.D., Cardiff University) is Senior Lecturer in Business and Management at Leicester Castle Business School, De Montfort University, UK. Louise teaches and conducts research in the fields of sustainability, corporate social responsibility, and business and human rights. Previously, Dr. Obara worked as Research Associate at the BRASS Research Centre (for Business Relationships, Accountability, Sustainability and Society) and as a social worker in the public sector.

Bruce Paton (Ph.D., University of California, Santa Cruz) earned an M.B.A. from Stanford University and is currently Professor of Management and Innovation at Menlo College. He helped launch the Sustainable Business program at San Francisco State University, has taught sustainable business courses for nearly twenty years, and has served as Dean for two business schools.

Gordon Rands (Ph.D., University of Minnesota) is Professor of Management at Western Illinois University, co-chair of its campus sustainability committee, and teaches classes in business ethics and social responsibility, managing organizations for environmental sustainability, and other management topics. Gordon is a co-founder and past chairperson of the Organizations and the Natural Environment (ONE) division of the Academy of Management and is a past president of the International Association for Business and Society (IABS).

Carolyn Reichert (Ph.D., Pennsylvania State University) is a Clinical Associate Professor at UT Dallas. She has served on the Sustainability Committee, and her research interests include sustainability, corporate governance, and compensation. She is also a graduate of The Ohio State University (B.S. in Finance and B.A. in Mathematics).

Bernadette Roche (Ph.D., University of North Carolina Chapel Hill) is an Associate Professor of Biology at Loyola University Maryland, where she is also Director of the Environmental and Sustainability Studies Minor. She is studying ecological genetics of a small mustard, *Arabidopsis lyrata*, the lyre-leaved rock cress. This close relative of the model organism, *A. thaliana*, grows throughout the eastern part of North America, in a variety of habitats. Her lab is interested in the extent to which several target populations have
become genetically differentiated, and whether the genetic differences are due to local adaptation, driven by natural selection. Dr. Roche obtained her B.A. in Biology at the University of Virginia.

Elke Schüßler (Dr.rer. pol., Freie Universität Berlin) is Professor of Business Administration and Head of the Institute of Organization Science at Johannes Kepler University Linz, Austria. She is a member of OS4Future and currently acts as Vice President of the European Group for Organizational Studies.

Robert Sroufe (Ph.D., Michigan State University) is the Murrin Chair of Global Competitiveness, and Professor of Sustainability at Duquesne University’s Palumbo Donahue School of Business. He develops research and project-based pedagogy within the #1 U.S.-ranked M.B.A. Sustainable Business Practices program. Winner of numerous teaching awards, he has published international and national refereed journal articles and multiple books on sustainable business practices.

Thomas E. Stone (Ph.D., University of Maine) is Associate Professor of Physics and the Sustainability Director at Husson University in Bangor, Maine. His research interests broadly include sustainability pedagogy, campus sustainability, and local energy issues. He received his commission as a Naval Officer after graduating with a B.S. in Physics from the United States Naval Academy and completed an M.S. in Physics at the University of Wisconsin–Madison.

Wendy Stubbs (Ph.D., Monash University) is Associate Professor in the Human Geography Discipline in the School of Social Sciences. She has taught Corporate Sustainability at Monash University for over fifteen years in the Master of Environment & Sustainability, the Master of Business Administration (M.B.A.), and the Master of Business. Her research seeks to understand how business can more holistically address its environmental, social, and economic responsibilities.

Amy K. Townsend (Ph.D., Antioch University New England) has authored several books on corporate environmental sustainability, business ecology, and biofuels, and has taught courses at the George Washington University and James Madison University. For more than twenty years, she ran Sustainable Development International Corporation, her own consulting firm, and worked with start-up companies in the areas of extreme energy efficiency and biofuels.

Madhavi Venkatesan (Ph.D., Vanderbilt University) is a faculty member in the Department of Economics at Northeastern University (Boston, Massachusetts). She is also Founder and Executive Director of Sustainable Practices, a Cape Cod-based environmental advocacy non-profit, and moreover holds master’s degrees in sustainability from both Harvard University...
and Vermont Law School. She has published three economics textbooks under the series *A Framework for Sustainable Practices* and her most recent book, *SDG8 – Sustainable Economic Growth and Decent Work for All*, was published in 2019.
