Contributors

Iván László ARNOLD is senior advisor to the CEO of HungaroControl, the Hungarian air navigation service provider. His experience in the aviation sector included working as general counsel for the Hungarian ANSP and MALÉV Hungarian Airlines. Mr. Arnold holds an LLM degree in EU competition law from the Brussels School of Competition and is member of the Budapest Bar Association.

Lorenzo CASULLO is Associate Director at Ricardo, providing advice on sustainable and intelligent transport. An economist by training, he has a global track record matured across infrastructure sectors both in private consultancy and as an international civil servant at the Organisation for Economic Cooperation and Development (OECD).

Carlos Oliveira CRUZ is an Associate Professor of Construction and Infrastructure Economics at Instituto Superior Técnico, University of Lisbon, Portugal, and a researcher at CERIS. He was an advisor to the Portuguese Secretary of State for Transportation and a visiting scholar at the Harvard Kennedy School, USA.

Brenda ESPINOSA APRÁEZ is a PhD researcher affiliated to the Tilburg Law and Economics Center (TILEC) and the Tilburg Institute for Law, Technology, and Society (TILT), Tilburg University, the Netherlands. She holds an LLM degree in International Business Law from Tilburg University and a bachelor’s degree in law from Universidad Externado de Colombia. Brenda’s professional experience combines practicing as corporate lawyer with academic positions involving research and teaching. Her fields of expertise and interest include business law, law and technology, the regulation of network industries and data governance.

Matthias FINGER is Professor Emeritus, Ecole Polytechnique Fédérale Lausanne (EPFL); part-time Professor, European University Institute (EUI), where he directs the Transport area of the Florence School of Regulation; Professor, Istanbul Technical University (ITÜ), where he directs the Istanbul Center for Regulation; he is also the editor-in-chief of the Journal Competition and Regulation in Network Industries.

Magnus GUSTAFSSON (DPhil, docent) is Research Director at the Laboratory
of Industrial Management at the Faculty of Science and Engineering, Åbo Akademi University. He is also visiting scholar at Kellogg School of Management. He has over 20 years of experience in research in projects and industrial investments with particular focus on distributed energy production and renewable energy production and the transport sector (land- and sea-freight). In 2010, Magnus received the International Project Management Association award for research with practical impact.

Christian JAAG, Counsel at Swiss Economics, holds a PhD in Economics and Finance from the University of St. Gallen. As a co-founder and counsel at Swiss Economics, he provides economic support to corporate and public-sector clients across the litigation/arbitration spectrum in commercial disputes, regulatory matters in network industries and competition cases. He works closely with clients and their legal advisers at all stages of a case, from drafting first arguments, writing full expert reports through to testimony in front of competition authorities, regulatory bodies and courts.

Günter KNIEPS is professor of economics at the University of Freiburg. He studied economics and mathematics and obtained his PhD in Bonn. He held post-doc positions at Princeton and the University of Pennsylvania and obtained his habilitation in Berne. He held a position as professor of microeconomics at Groningen (Netherlands) before taking over a chair at the University of Freiburg. He is author of numerous publications on network economics, (de-)regulation, competition policy, and sector studies on network industries (e.g. transport, telecommunications and postal markets, internet, and energy). He is a member of the Scientific Advisory Councils of the Federal Ministry of Economics and Energy.

Juan MONTERO is part-time professor, Florence School of Regulation, European University Institute (Italy) and Full Professor Titular in UNED (Madrid, Spain) where he lectures on regulation and administrative law. He is counsel in MLAB Abogados in Madrid. He works on the regulation of the traditional (railways, telecoms and postal services) and the new network industries (digital platforms).

Valerie REIF is a research associate at the Florence School of Regulation, European University Institute (Italy), where she is part of the research team in electricity regulation. Before joining FSR in 2018, she worked at the Technology Platform Smart Grids Austria. Valerie holds both a BSc and an MSc degree in Renewable Energy Engineering from the University of Applied Sciences Technikum Wien in Austria and a BA in European Studies from the University of Passau in Germany.

Nicolò ROSSETTO is a research associate at the Florence School of
Regulation, European University Institute (Italy), where he is part of the research team in electricity regulation. Before joining FSR in 2016, Nicolò was external advisor to the World Bank, founding member of the Energy Watch at ISPI (Milan) and teaching assistant at the University of Pavia (Italy). Graduated first in Political Science and then in International Economics, Politics and Institutions, Nicolò holds a PhD in Law and Economics from the University School for Advanced Studies of Pavia (IUSS).

Joaquim Miranda SARMENTO is an Assistant Professor at ISEG – Lisbon School of Economics and Management, Universidade de Lisboa and a researcher at Advance/CSG. He holds a PhD in Finance from Tilburg University. He worked 10 years in the Portuguese Ministry of Finance, was a consultant at UTAO (Portuguese Parliament Technical Budget Unit) and was the Chief Economic Advisor to the Portuguese President of the Republic Professor Cavaco Silva from 2012 to 2016.

Volker STOCKER is a postdoctoral researcher at TU Berlin and head of a multidisciplinary research group at the Weizenbaum Institute for the Networked Society. Before this, he was a doctoral researcher at the University of Freiburg and the Max Planck Institute for Informatics in Saarbrücken. He holds a doctoral degree and a diploma degree in economics from the University of Freiburg. During his time as a doctoral researcher, he was a visiting researcher at the TU Berlin, the University of Northumbria, and the Massachusetts Institute of Technology (MIT). His research interests encompass the economics and evolution of digital platforms, technologies, the Internet ecosystem, and broadband and Internet policy.

Anastasia TSVETKOVA, PhD, docent, is a postdoc researcher at the Laboratory of Industrial Management, Faculty of Science and Engineering, Åbo Akademi University, within the profile area ‘The Sea.’ She has an MSc (Econ.) degree from St. Petersburg State Polytechnic University (2009) and a DSc (Tech.) degree from Åbo Akademi University (2015). Her fields of expertise include business ecosystem redesign with a focus on institutional work, governance mechanisms and supra-organizational strategy. She has been a visiting scholar at University College London and at Stanford University.

Kim WIKSTRÖM is professor (chair) in Industrial Management at the Faculty of Science and Engineering, Åbo Akademi University. He has been visiting professor at Stanford University, USA, St. Petersburg State University, Russia and Tallinn Technical University, Estonia and visiting scholar at Norwegian University of Technology, Norway and Linköping University, Sweden. His and his research groups’ areas of research and expertise are value creation and industrial logic and business models (strategies, offering, modularization, integration mechanisms and services) in industrial
investments and project-based firms and organizational design (capabilities/competencies, risk and uncertainty, organizational structures) in large infrastructure and industrial investments.
