Editors

Marcelo Corrales Compagnucci is an attorney-at-law specializing in privacy, data protection, intellectual property and information technology law. He is currently an Associate Professor at the Center for Advanced Studies in Biomedical Innovation Law (CeBIL), Faculty of Law, University of Copenhagen. He has a Doctor of Laws (LLD) degree from Kyushu University in Japan. He also holds a Master of Laws (LLM) in international economics and business law from Kyushu University, and an LLM in law and information technology and an LLM in European intellectual property law, both from the University of Stockholm in Sweden. His most recent publications include *Smart Contracts: Technological, Business and Legal Perspectives* (Hart 2021); *Big Data, Databases and 'Ownership' Rights in the Cloud* (Springer 2020); *Legal Tech, Smart Contracts and Blockchain* (Springer 2019); *Robotics, AI and the Future of Law* (Springer 2019); and *New Technology, Big Data and the Law* (Springer 2017). His past activities have included being a research associate with the Institute for Legal Informatics and IT Law at Leibniz Universität Hannover (Germany) from 2007 to 2018. He also worked as a consultant and lawyer for various IT companies.

Helena Haapio is an Associate Professor of Business Law at the University of Vaasa, Finland, an Adjunct Professor of Proactive Law and Contract Design at the University of Lapland, and a contract strategist at Lexpert Ltd, Helsinki. After completing legal studies at the University of Turku, Finland, and Cambridge University, England, she served for several years as in-house legal counsel in Europe and the USA. A pioneer of the proactive law approach, she has for many years promoted the use of simplification and visualization in commercial contracting. Her multidisciplinary research focuses on ways to enhance the functionality and usability of contracts through design. Her recent books include *Legal Tech, Smart Contracts and Blockchain* (Springer 2019); *Next Generation Contracts: A Paradigm Shift* (Lexpert 2013); and two titles co-authored with Professor George Siedel, *A Short Guide to Contract Risk* (Gower 2013) and *Proactive Law for Managers: A Hidden Source of Competitive Advantage* (Gower 2011). She is also a co-founder of the Legal Design Alliance and a co-author of its Legal Design Manifesto.

Margaret Hagan is the Director of the Legal Design Lab at Stanford University, as well as lecturer in the Institute of Design (the d.school). She is a lawyer, and holds a JD from Stanford Law School, a DPhil from Queen's University Belfast, an MA from Central European University, and an AB from University of Chicago. She specializes in the application of human-centered design to the legal system, including the development of new public interest technology, legal visuals, and policy design. Her research and teaching focuses on the development and evaluation of new interventions to make the legal system more accessible. Her recent articles include 'Participatory Design for Innovation in Access to Justice' ((2019) 148(1) *Daedalus* 120) and 'A Human-Centered Design Approach to Access to Justice' ((2018) 6(2) *Indiana Journal of Law and Social Equality* 199).

Michael Doherty is Professor of Law, and Associate Head of the Law School, at Lancaster University, UK. His main substantive areas of teaching and research are constitutional law and human rights, and he is author (with Dr Noel McGuirk) of *Public Law* (3rd edn, Routledge 2022). His key interests in higher education are teaching and learning in law, and he co-created the Connecting Legal Education online community in 2020. He was Director of Teaching and Learning at Lancashire Law School, UCLan for 15 years and is responsible for pedagogic development at his present law school. He was elected Chair of the Association of Law Teachers (ALT) in 2004 and served on the ALT committee for eight years. Professor Doherty's recent publications include 'Comprehensibility as a Rule of Law Requirement: The Role of Legal Design in Delivering Access to Law' ((2020) 8(1) *Journal of Open Access to Law*) and (with Tina McKee) 'Service Design Comes to Blackstone's Tower: Applying Design Thinking to General Legal Education Programme Development' in Allbon E and Perry-Kessaris A (eds) *Design and Visualisation in Legal Education* (Routledge 2021).
