## CO-EDITORS

**John A. List** is the Homer J. Livingston Professor of Economics at the University of Chicago and a research associate at the National Bureau of Economic Research.

**Michael K. Price** is an Associate Professor in the Department of Economics at Andrew Young School of Policy Studies, Georgia State University. He is also a research fellow at the Howard H. Baker Jr. Center for Public Policy and a faculty research fellow at the National Bureau of Economic Research.

## CONTRIBUTORS

**Robert P. Berrens** is a Professor and Regents' Lecturer in the Department of Economics at the University of New Mexico. His research interests focus on non-market valuation and sustainable development.

**Francois Bousquet** is a modeling scientist with CIRAD. His research interests focus on participatory modeling and on the development and use of multi-agent systems for the simulation of resource management issues.

**Juan-Camilo Cardenas** is a Professor in the Department of Economics at the Universidad de los Andes. His research interests focus on the role of institutions in promoting cooperation in social dilemmas.

**Rachel Croson** is a Professor in the Department of Economics at the University of Texas at Dallas and Director of the Negotiations Center in the School of Economic, Political, and Policy Sciences. She is currently the Director of the Social and Economic Sciences Division of the Social, Behavioral, and Economic Sciences Directorate at the National Science Foundation.

**Alex Farrell** was an Associate Professor in the Energy and Resources Group at the University of California, Berkeley.

**Lata Gangadharan** is a Professor in the Department of Economics at Monash University. Her research interests focus on formulating policies

for improving environmental quality and experiments on markets and auction design.

**Gaston Giordana** is an economist with the Financial Stability Department at the Banque central du Luxembourg.

**John K. Horowitz** is an economist with the Resource and Rural Economics Division at the USDA. His research focuses on the economics of climate change with special emphasis on the costs of agricultural greenhouse gas reduction.

**Marco Janssen** is an Associate Professor in the School of Human Evolution and Social Change at Arizona State University and the Director of the Center for the Study of Institutional Diversity. His research interests focus on the use of experiments and agent-based modeling to understand how people solve collective problems.

**Jack L. Knetsch** is an Emeritus Professor of Economics at Simon Fraser University. His research interests are in behavioral economics and cost-benefit analysis.

**Stephan Kroll** is an Associate Professor in the Department of Agricultural and Resource Economics at Colorado State University. His research focuses on the institutional and behavioral components of decision-making with an emphasis on applications that arise from environmental and resource issues.

**Maria Claudia Lopez** is an Assistant Professor in the Department of Rural and Regional Development at the Universidad Javeriana Columbia. Her research interests are in the use of field experiments and related methods to understand how rural communities manage common property.

**Charles F. Mason** is the H.A. 'Dave' True, Jr. Chair in Petroleum and Natural Gas Economics in the Department of Economics and Finance at the University of Wyoming. His research interests focus on the exploration and extraction of non-renewable resources and issues regarding common-property resources.

**Kenneth E. McConnell** is a Professor in the Department of Agricultural and Resource Economics at the University of Maryland, College Park. He is a fellow of the Agricultural and Applied Economics Association and the Association of Environmental and Resource Economists.

**Michael McKee** is a Professor in the Department of Economics at Appalachian State University and Director of the Appalachian Experimental Economics Laboratory. His research interests focus on the

voluntary provision of public goods, tax compliance, and the valuation of environmental goods.

**Klaus Moeltner** is an Associate Professor in the Department of Agricultural and Applied Economics at Virginia Tech University.

**James J. Murphy** is a Professor in the Department of Economics at the University of Alaska, Anchorage.

**William S. Neilson** holds the J. Fred Holly Chair of Excellence in the Department of Economics at the University of Tennessee, Knoxville. His research interests are in the areas of decision theory and behavioral economics and he is currently the editor of the *Journal of Economic Behavior and Organization*.

**Christopher F. Parmeter** is an Assistant Professor in the Department of Economics at the University of Miami. His primary research interests are nonparametric econometrics and the use of hedonic techniques.

**Jaren C. Pope** is an Assistant Professor in the Department of Economics at Brigham Young University. His primary research interests focus on the use of quasi-experimental hedonic techniques to understand how households value environmental and urban amenities.

**Katherine Silz Carson** is a Professor in the Department of Economics and Geography at the United States Air Force Academy. Her research interests are in non-market valuation and the provision of environmental public goods.

**John M. Spraggon** is an Associate Professor in the Department of Resource Economics at the University of Massachusetts, Amherst.

**Jan T.R. Stoop** is an Assistant Professor in the Department of Applied Economics at Erasmus University. His research interests are in the areas of behavioral economics and social dilemmas.

**John K. Stranlund** is a Professor in the Department of Resource Economics at the University of Massachusetts, Amherst. His research interests focus on the theory and experimental evaluation of environmental and natural resource management.

**Daan P. van Soest** is a Professor of Environmental Economics at VU University Amsterdam. His research interests are in the areas of environmental policy design, renewable natural resource use, and the conservation of biodiversity.

**Maria Alejandra Velez** is an Assistant Professor in the School of Management at the Universidad de los Andes in Bogota, Colombia. Her research focuses on the study of decision making and institutional design for the management of natural resources. She has designed and conducted field experiments in Colombia and Brazil to study social dilemmas and decision making under uncertainty and scarcity.

**Christian A. Vossler** is an Associate Professor in the Department of Economics at the University of Tennessee, Knoxville and a research fellow at the Howard H. Baker Jr. Center for Public Policy. His primary research interests focus on non-market valuation and the regulation of environmental and natural resources.

**Jana Vyrastekova** is an Assistant Professor in the Department of Economics at Radboud University Nijmegen. Her research interests are in the areas of experimental economics and cooperation in social dilemmas.

**Marc Willinger** is a Professor of Economics at the Laboratoire Montpellierain d'Economie Theorique et Appliquée.

**David Zetland** is a senior water economist at Wageningen University. His research interests are in the areas of the political economy of natural resources and the design and performance of institutions for managing water.
