**Mohamed Aslam** is a senior lecturer with the Department of Economics, Faculty of Economics and Administration, University of Malaya, Kuala Lumpur. He holds two PhDs. The first is from the University of Malaya and the other from the Hiroshima City University, Japan. His main areas of research are international trade policy, regional economic integration, international macroeconomics and post-Keynesian economics. He has written articles on various subjects relating to the Malaysian economy, macroeconomics and regional economic integration, and has advised the Malaysian government on a few development projects. He is on the editorial board of the *Research Journal of Asia Pacific, Pakistan and Journal of Southeast Asia Studies*, Malaysia.

**Riccardo Bellofiore** is Professor of Political Economy, 'Hyman P. Minsky' Department of Economics, University of Bergamo, Italy and Research Associate in the History and Methodology of Economics Group at the Faculty of Economics and Econometrics, University of Amsterdam, The Netherlands. He teaches monetary economics, history of economic thought, and theories of knowledge in Bergamo, and history of economic thought in the Political Economy PhD program in Pavia. His current research interests include the economics of globalization, the development and crisis of contemporary capitalism, endogenous theories of money, Marxian value and crisis theory, and economic philosophy.

**Mehdi Ben Guirat** is an interdisciplinary PhD candidate in Economics at the University of Missouri at Kansas City and a research associate at the International Economic Policy Institute, Laurentian University, Ontario, Canada. He is currently researching different economic relations between regional trading blocs, especially between the European Union and African countries. His dissertation topic and some of his recent publications relate to how to break economic dependence in developing countries.

**Fernando J. Cardim de Carvalho** is Full Professor of Economics at the Institute of Economics at the Federal University of Rio de Janeiro, Brazil. He obtained his PhD in Economics from Rutgers University (USA) in 1986. A former chairman of the National Association of Graduate Schools of Economics of Brazil, he has done consulting work for, among others,

the National Development Bank of Brazil, CEPAL, G24 and NGOs such as Ibase (Brazil), Action Aid USA, and WEED World Economy, Ecology and Development (Germany). He is the author or co-author of five books, including *Mr Keynes and the Post Keynesians* (Edward Elgar, 1992), has published in journals such as the *Journal of Post Keynesian Economics*, *Cambridge Journal of Economics* and *Banca Nazionale del Lavoro Quarterly Review*, and has contributed over 40 chapters to book collections.

**Taha Chaiechi** completed her PhD in Economics in 2009 at the University of Newcastle, Australia, during which she developed substantial expertise in econometric techniques, specifically shock-response modelling. She joined James Cook University in 2009. With her background in applied economics, econometrics and modelling, She has considerable skill at systematically modelling dynamic relationships between economic, environmental, and/or social variables. She became a university finalist in the 'My research in 3 minutes' competition in the Early Career Researcher (ECR) category, winning Discipline and Faculty rounds. She has twice received the 'Inclusive Practice Acknowledgement Award, IPAA' from James Cook University in 2010 and 2011.

**Mickaël Clévenot** obtained his doctoral degree in economics in 2006. He is a member of LEG – Laboratoire d'Économie et de Gestion de l'Université de Bourgogne, Dijon, France. He is a lecturer in economics at the University of Burgundy. His principal area of research deals with the impact of financial liberalization and the financialization of the French economy. He also works on the financial liberalization of emerging markets and the financial integration of the EMU. His analytic framework is shared between French regulation theory and post-Keynesian models, more specifically the stock–flow consistent approach. This analytical framework allows him to represent the struggles between the different economic agents and their consequences on several financialized growth regimes.

**Eugenia Correa** is Professor in Economics, Finance and Development at the Mexico National University. She has a PhD degree from the Mexico National University and is a member of the Mexican Science Academy and of the National Research System. She received the Economics Research Award from the Mexico National University. Her research interests are in areas of macroeconomic financial policy, financial systems and feminist economics. She is author and editor of more than 25 books, and also more than 100 contributions for journals and books.

**Claude Gnos** is Associate Professor of Economics at the University of Burgundy and Director of the Center for Monetary and Financial Studies

in Dijon, France. He is the author of *L'Euro* (Management et Société, 1998) and *Les grands auteurs en économie* (Management et Société, 2000), and co-editor of *Post Keynesian Principles of Economic Policy* (Edward Elgar, 2006, with Louis-Philippe Rochon) and *The Keynesian Multiplier* (Routledge). He has also published a number of articles on monetary economics, circuit theory and the history of economic thought, which have appeared in books and refereed journals (*Journal of Post Keynesian Economics*, *Review of Political Economy*, *International Journal of Political Economy*, *Economie Appliquée*, *Revue d'Economie Politique*, *Economies et Sociétés*).

**Yann Guy** is a PhD student at LADYSS (Laboratoires Dynamiques Sociales et recomposition des espaces) at the Université Paris Diderot – Paris 7. His thesis focuses on financial macroeconomics, and in particular on the study of the impact of market finance, in contrast with bank finance, on firms' investment behaviour in Western countries and especially in France. The empirical work consists in undertaking a comparison between the phenomena observed at the microeconomic level from consolidated group accounts and at the macroeconomic level from national account data.

**Joseph Halevi** studied at the University of Rome. He teaches in the Department of Political Economy at the University of Sydney and regularly at the Université de Nice at the CEMAFI and at the Université de Grenoble Pierre Mendès France. He has published with *Economie Appliquée*, *Banca Nazionale del Lavoro Quarterly Review*, *Monthly Review*, and has written chapters in a number of co-edited books both by himself and with other colleagues.

**Dany Lang** is Associate Professor (maître de conférences) at Université Paris 13. He is the coordinator of the task group 'Post-Keynesian analyses and modelling' of the Center of Economics of Paris North (National Center for Scientific Research). His research interests are on growth, unemployment, inflation, labour economics, as well as on related epistemological issues. He has published various papers in several journals, such as the *Journal of Post-Keynesian Economics*, the *Review of Political Economy* and the *International Review of Applied Economics*. He currently teaches macroeconomics, labour economics and modelling, at both undergraduate and graduate level. He lectures at Paris 13, but also at the Université de Haute Alsace in Mulhouse and the University of Paris 1 Panthéon-Sorbonne. Previously, he taught and led research at the Université d'Aix-Marseille 2 (where he received his doctorate), at Sciences Po Toulouse and at the National University of Ireland, Galway.

**Noemi Levy Orlik** received her PhD in Economics from the Universidad Nacional Autónoma de México (UNAM), Mexico City, in 1999. She is Professor in the Economic Department at UNAM. Her areas of research are monetary economics, with particular attention to development issues of Latin American countries, with specific emphasis on finance and financial institutions in developing countries. She is presently coordinating the research project 'Financialisation and Economic Growth', financed by DGAPA-UNAM. She belongs to the Mexican System of National Research (SNI-CONACYT). She has published two books and edited seven, coordinated journals issues and written multiple papers that have been published as book chapters and paper-journals.

**Julio López** took his BA in Economics at the Universidad de Chile, and his PhD at the University of Warsaw, Poland. He is currently Full Professor of Economics at the Universidad Nacional Autónoma de México, and has been Visiting Professor at the Universidad Autónoma de Barcelona and the Ecole des Hautes Etudes en Sciences Sociales. He was until recently the editor of *Investigación Económica*, the scientific journal of the Faculty of Economics of the Universidad Nacional Autónoma de México. He is the author of three books and the editor of another two. He has published in the *Journal of Post Keynesian Economics*, the *International Review of Applied Economics*, the *Review of Political Economy*, *Banca Nazionale del Lavoro Quarterly Review*, *Economie Appliquée*, the *Brazilian Journal of Political Economy*, *Trimestre Económico*, *Metroeconomica*, *Revista de Economía Contemporanea*, *International Journal of Political Economy*, and *Investigación Económica*, among others.

**Wesley C. Marshall** graduated from the College of William and Mary, USA with a BA in Political Science. He received his PhD in Latin American Studies at the Universidad Nacional Autónoma de México, with a dissertation entitled 'The role of state-owned commercial banks in the trajectory of the banking systems of Mexico, Argentina and Uruguay (1988–2007)'. Wesley C. Marshall has several articles and chapters of books published in various countries, and has participated in a number of national and international conferences

**Etelberto Ortiz Cruz** is Distinguished Professor at Universidad Autónoma Metropolitana, México. He recently published a book on structural change policies in Mexico, which advances an assessment on the policies established during the last 25 years. There he emphasizes the leading role of monetary policy and the adverse consequences for development and stability. He also has published a number of articles on inflation targeting in small open economies.

**Corinne Pastoret** is Associate Professor at Laurentian University, Sudbury, Canada. She holds a doctorate from the University of Dijon on the role of banks in post-Keynesian monetary theory. Her research also deals with employment guarantee policy in developing countries, with an emphasis on Argentina. She is currently studying the issue of financing economic growth in Latin American and Maghreb countries and is interested in resource-based development policies in Canada.

**Louis-Philippe Rochon** is Associate Professor of Economics at Laurentian University, Canada, and Director of the International Economic Policy Institute. He has authored over 90 journal and book articles, and has written or edited numerous books, including *Credit, Money and Production* (Edward Elgar, 2005), *Modern Theories of Money: The Nature and Role of Money in Capitalist Economies* (Edward Elgar, 2003, co-edited with Sergio Rossi), *Monetary and Exchange Rate Systems: A Global View of Financial Crises* (Edward Elgar, 2006, co-edited with Sergio Rossi), and *Credit, Money and Macroeconomic Policy* (Edward Elgar, 2011, with Claude Gnos). His papers have appeared, among other places, in *Review of Political Economy*, *International Journal of Political Economy*, *Metroeconomica*, *Journal of Economic Issues*, *Economie Appliquée*, and the *Journal of Post Keynesian Economics*. His research is on macroeconomic and monetary theory and policy, and post-Keynesian economics.

**Mark Setterfield** is Professor of Economics in the Department of Economics at Trinity College, Hartford, Connecticut and Associate Member of the Cambridge Centre for Economic and Public Policy at Cambridge University, UK. His main research interests are macrodynamics (with a particular focus on the development and application of concepts of path dependence) and post-Keynesian economics. He is the author or editor of several books on macroeconomics, and has published in journals including the *Cambridge Journal of Economics*, *Journal of Post Keynesian Economics*, *European Economic Review*, *Review of Political Economy*, *Journal of Economic Issues* and *The Manchester School*.

**Engelbert Stockhammer** is Professor at Kingston University, London, UK. His research areas are macroeconomics, applied econometrics, European integration, financialization and heterodox economics. Recently his research has focused on the demand effects of changes in functional income distribution, economic policy in Europe and the macroeconomic effects of financialization. He has published many articles in journals, including the *Cambridge Journal of Economics*, *Journal of Post Keynesian Economics*, *Structural Change and Economic Dynamics*, *Review of Radical Political Economics* and *Journal of Economic Issues*. He has published

a book on *The Rise of Unemployment in Europe* (Edward Elgar 2004) and co-edited *A Modern Guide to Keynesian Macroeconomics and Economic Policies* (Edward Elgar, 2011).

**Domenica Tropeano** is Associate Professor of Economics at the faculty of Economics of the University of Macerata (Italy). She has an MA from the University of Warwick and a doctorate from the European University Institute. She has studied and published in the field of history of economic thought, history of macroeconomics and is currently working on the issue of macroeconomic policies and globalization.

**Vincent Vernay** is a PhD student at the University of Burgundy, Dijon, France. He is a member of the Center for Monetary and Financial Studies in Dijon. He took part in several colloquiums these last years and is a member of the Association for the Development of Keynesian Studies (ADEK in French) and the French Association of Political Economy (FAPE). His main interests are in employment, macroeconomics, monetary theory and history of economic thought.
