Introductory Note

References such as '178–9' indicate (not necessarily continuous) discussion of a topic across a range of pages. Because the whole of this work is about 'federalism', use of this term (and certain others which occur throughout) as an entry point has been restricted. Please look under the appropriate detailed entries. Wherever possible in the case of topics with many references, these have either been divided into sub-topics or only the most significant discussions of the topic are listed.
