Karin Bäckstrand is associate professor (tenured) of political science, Lund University, Sweden. Her research interests are global environmental politics and the role of scientific expertise in environmental negotiations. Her dissertation explored the role of scientific advice and dominant framings of risk and scientific uncertainty in transboundary air pollution diplomacy. Her postdoctoral work examined the normative dimension of scientific expertise, encapsulated in calls for public participation in scientific decision making. Her research has been published in *Environmental Politics* and *Global Environmental Politics* as well as numerous book chapters. She teaches at the Department of Political Science as well as in the Lund University International Master's Program in Environmental Studies and Sustainability Science at the Lund University Center for Sustainability Studies (LUCSUS), where she has developed and taught a range of courses in environmental politics since 1997.

Frank Biermann is professor of political science and of environmental policy sciences at VU University Amsterdam, The Netherlands, and visiting professor of earth system governance at Lund University, Sweden. He specializes in global environmental governance with an emphasis on climate negotiations, UN reform, global adaptation governance, public-private governance mechanisms, the role of science and North-South relations. Biermann holds a number of research management positions, including head of the Department of Environmental Policy Analysis at VU University Amsterdam and director-general of the Netherlands Research School for Socioeconomic and Natural Sciences of the Environment (SENSE), a national research network of nine research institutes with 150 scientists and 400 PhD students. He is also the founding chair of the annual series of Berlin Conferences on the Human Dimensions of Global Environmental Change; founding director of the Global Governance Project, a long-term joint research programme of 12 European research institutions; and chair of the Earth System Governance Project, a 10-year core project of the International Human Dimensions Programme on Global Environmental Change.

Sander Chan is a doctoral candidate in international environmental governance with the Department of Environmental Policy Analysis, Institute for Environmental Studies, VU University Amsterdam, The Netherlands. He is also a research fellow under the EU Science and Technology Fellowship Program in China (STF China), hosted by Renmin University of China (RUC), School of Environment and Natural Resources, and a fellow of the Global Governance Project. He specializes in the application of global environmental governance instruments in China's sustainable development. Currently he is conducting research on the effectiveness and legitimacy of partnership governance in China's forestry and biodiversity. The research is part of a project on partnerships for sustainable development at VU University Amsterdam, funded by the Netherlands Organisation for Scientific Research, which included the development of the Global Sustainability Partnerships Database. He also organized a 2009 EU Roundtable on the Future of Environmental Governance in China and coordinates the China network of the Earth System Governance Project.

Daniel Compagnon is a full professor of political science and international relations at Sciences Po, University of Bordeaux, and a researcher at the CNRS centre Science Politique Relations Internationales Territoire (SPIRIT). He teaches on the environment in international relations and global environmental governance, with a special interest in developing countries. With significant fieldwork expertise on Africa, his research currently focuses on the actual and potential contribution of 'fragile' states and 'areas of limited statehood' to global environmental governance. He holds a BA in political science, a Master's degree in social sciences and a PhD in political science, all from French universities. He previously served as director of the French Institute for Africa in Harare, Zimbabwe, and as professor at the University of the French West Indies. His latest book is *A Predictable Tragedy: Robert Mugabe and the Collapse of Zimbabwe* (University of Pennsylvania Press, 2010).

Eleni Dellas is a doctoral candidate with the Department of Environmental Policy Analysis at the Institute for Environmental Studies (IVM), VU University Amsterdam, The Netherlands. Her research interests include the distributive effects of market-based environmental governance and the legitimacy and effectiveness of public–private partnerships for sustainable development. She also acts as communication officer of the Global Governance Project.

Aysem Mert is a postdoctoral researcher at the Amsterdam Global Change Institute (AGCI), VU University Amsterdam, The Netherlands.

She holds master's degrees in international relations and environmental sciences. Her doctoral studies focused on partnerships for sustainable development and the discourses of environment and democracy in global environmental governance. Among other things, she has been manager of the 2007 Amsterdam Conference on the Human Dimensions of Global Environmental Change and managing editor of the working paper series of the Global Governance Project. Her research has appeared in *Forest Policy and Analysis* and in the edited book *Partnerships for Sustainable Development* (Edward Elgar, 2008).

Christina Müller is a PhD fellow at Bremen International Graduate School of Social Sciences (BIGSSS), specializing in the area of international relations. She holds a Master's degree in political science from the University of Bremen and is a member of the European COST Action 'The Transformation of Global Environmental Governance: Risks and Opportunities'. Her research interests include global environmental governance, the role of non-state actors in international politics and corporate social responsibility (CSR). Her doctoral dissertation focuses on social and environmental self-regulation of transnational corporations in the global garment industry.

Philipp Pattberg is an associate professor (tenured) of transnational environmental governance with the Department of Environmental Policy Analysis, Institute for Environmental Studies, VU University Amsterdam, The Netherlands. He also serves as the deputy-director and research coordinator of the Global Governance Project. Further, he is Management Committee Chair of the European COST Action 'The Transformation of Global Environmental Governance: Risks and Opportunities' and one of three speakers of the Environmental Policy and Global Change section of the German Political Science Association (DVPW). He is the author of *Private Institutions and Global Governance: The New Politics of Environmental Sustainability* (Edward Elgar, 2007); co-editor of *Global Climate Governance beyond 2012: Architecture, Agency and Adaptation* (Cambridge University Press, 2010) and co-editor of *Global Environmental Governance Reconsidered* (MIT Press, 2012).

Kacper Szulecki is a researcher at the Cluster of Excellence 'Cultural Foundations of Integration' and a doctoral candidate in political sociology at the University of Constance, Germany. Further, he is Board President and research coordinator of the Environmental Studies and Policy Research Institute (ESPRi), Wrocław, Poland. He holds an MSc in International Relations from VU University in Amsterdam, where he

also conducted a research internship at the Institute for Environmental Studies. From 2003 until 2007 he studied political science, international relations and sociology at the Universities of Warsaw and Oslo, as well as social psychology at the Warsaw School of Humanities and Social Sciences. His research interests include environmental politics, global governance, social movements and dissent (with a focus on East-Central Europe).
