Aims and scope

The European Journal of Economics and Economic Policies: Intervention (EJEEP) is a peer-reviewed journal which serves as a forum for studies in macroeconomic theory, economic institutions and economic policies. The managing editors aim for productive debates involving one or more variants of heterodox economics, and invite contributions acknowledging the pluralism of research approaches. The submission of both theoretical and empirical work is encouraged. The managing editors contend that a wide variety of institutional and social factors shape economic life and economic processes. Only a careful study and integration of such factors into economics will lead to theoretical progress and to competent economic policy recommendations. This was clearly demonstrated by the inadequacy of orthodox economics, based on neoclassical foundations, to provide suitable explanations and responses to recent financial and economic crises.

The submission of both theoretical and empirical work is encouraged.
